Source: makemoonshot.co/caption-templates (public page, Oct 2026). Studied from official thumbnails and preview-video frames.

Contents

- **1. The core system** — subtitle voice + hero voice
- **2. Rules across the library** — fonts, colours, density, placement, case
- **3. Pattern families** — what each look is for
- **4. How to use it** — picking a style, caption plan, editor brief, review checklist
- **5. Template catalog** — all 99 templates with thumbnail cards and specs
- **6. Quick index**

How to read a thumbnail card: the first panel is Moonshot's official thumbnail; the next three are frames from the template's preview video where the text is visible. The header shows name, family, plan and fonts.

1. The core system: every template is two voices

Almost every Moonshot template layers the same two voices.

- **Subtitle voice (small).** The words being spoken right now, at most 2–4 on screen. Neutral sans (Montserrat, Inter, Poppins), sentence case or lowercase, white or off-white. Chest height or lower third; never covers the face.
- **Hero voice (huge).** One meaning word per sentence — the noun, verb or number that carries the idea (IDEA, DISCIPLINE, PROGRESS, THREE, $600,000). 4–8× the subtitle size, a display face with the opposite personality, top third, usually behind the speaker's head. Between hits the hero slot stays empty — that is what makes the hits land.
- The spoken word inside the subtitle often flips to the hero's accent colour, tying the two voices together.

2. Rules across the library

Font pairing

Pair a neutral sentence font with an accent font that contrasts on two axes: size and style.

Accent personality	Accent fonts (seen in)	Sentence font
Heavy condensed caps	Anton, Bebas Neue, Archivo Black, Black Han Sans, Oswald	Montserrat Bold, Inter, Instrument Sans
Brush / calligraphy script	Kaushan Script, Great Vibes, Pinyon Script, Ballet, Dancing Script	Montserrat Bold, Inter Regular
Editorial serif / italic	Playfair Display, Instrument Serif, Gloock, DM Serif Display, Unna	Poppins Medium, Instrument Sans, Open Sans
Comic / fat rounded	Luckiest Guy, Bagel Fat One, Baloo 2 ExtraBold	Montserrat Bold, Poppins Bold
Texture / retro	Press Start 2P, Special Elite, Rubik Spray Paint, Lacquer	Typewriter or serif
Handwritten	Gloria Hallelujah, Caveat Brush, Just Me Again Down Here	Anton, BBH Bartle

Two colours, one accent

Base is white or warm off-white. One saturated accent, used only on hero words and the active word. Pull it from the set or wardrobe (lime notebook → lime hero in Signal; mustard wall → gold in Masala).

white	cream	yellow	gold	lime	acid lime
#FFFFFF	#F6EFE2	#FFE500	#FFD700	#A8FF1A	#C6FF3D

red	tomato	cobalt	ice blue	orange	magenta
#E50914	#E2382A	#2B53D4	#7FD3FF	#FF6A2B	#EC00B5

Density, placement, case

- Most templates show **2–4 words** at a time (max 8). Real Estate is the exception: up to 16 small words under big numbers.
- One hero per sentence, never two at once. Short and punchy beats long and readable.
- Hero in the top third, full width, often clipped by or tucked behind the head. Subtitle at chest or lower third.
- Playful styles: tiny asides top-left, big words around the body — never on the face.
- Stay in the Reels safe zone: nothing in the bottom ~20% or the right-side button column.
- Caps belong to the hero; sentence case or lowercase to the subtitle. Editorial looks use sentence case with the key word in italic serif.

3. Pattern families

Family	Templates	What it does / use for
Behind the person	Eclipse, Gatekeep, Signal, Kumar, Masala, Sunburst, Crimson, Golden Hour, Chrome, Ghostline, Sprayline, Retro Cut, Sticker, Calligraph, Soundwave, Aura, Desi Bold, Monument, Lime Swipe	Hero word masked behind the head, white subtitles in front. Hooks, founder takes, personal brand. Needs clean wall above the head; skip on wide or busy shots.
Multiline lockups	Supernova, Gold Centre, Blue Muse, Red Shift, Diagonal, Headliner, Margin Note, Moonbeam, Fireline, Focusline	2–3 stacked rows in the lower third: tiny tracked caps, one giant hero row, sometimes a tiny trailing word. Cinematic talking heads with no masking.
Editorial serif	Delhi, Soft Script, Serif Quote, Crimson, Storyline, Pastel Fisheye	Clean sans sentence with the key word in italic serif. Luxury, fashion, lifestyle, quotes.
Active word / karaoke	Floodlight, Filmstrip, Karaoke, Lime Swipe, Liquid Glass, Beast Mode, Pink Neon, Searchlight	ALL CAPS, 3–5 words, centred low; active word gets a box, wipe, glow or pill. Retention, sound-off, podcasts, tutorials.
Playful scatter	Pop Off, Butter, Cursive, Blush Lab, Ribbon, Cutout	Tiny white asides plus big chartreuse/butter words around the speaker. Lifestyle, food, comedy.
Spatial 3D	Spatial Red, Spatial Yellow, Spatial White, Deep Focus	Words pinned in 3D around the room, tracked to camera, mixing tiny and huge sizes.
Dynamic motion	Inception, Linen, Quill, Glide, Wiggle, Dolly	Motion is the style: frame-filling inverted word, typing cursor, script flicker, gliding script, painted path, spring-in keyword.
Real estate / numbers	Agent Story, Number Story, Gradient Estate, Dimension Story	Huge outlined amounts, counters that roll up, bold magenta/green keyword over small captions. Use when a number is the hook.
Desi / Hinglish	Desi Bold, Tabahi	Baloo 2 ExtraBold handles Devanagari and Roman in one face. Tabahi = comic caps over a rounded Hinglish line.
AI Edits (35)	Blackboard, Kraft, Matinee, Boldface, Notes, Riso, B-Side, Afterglow, Podcast Cutout, Explainer, Moodboard and more	Full edit treatments, not just captions — see scene grammar below.

AI Edits scene grammar

- **Hook title card** — giant or repeated stacked word (DISCIPLINE ×5, a STORY wallpaper with one glowing line, RECORD bands top and bottom).
- **Talking head** in the family's caption style.
- **B-roll cutaway** with the caption still running over it.
- **Graphic board moment** for lists, numbers and contrasts: note card with ticking checkboxes, receipt, polaroids, blueprint grid with selection boxes, torn paper and tape labels, envelope with wax seal, TV frame, speaker as a white-outlined sticker.
- **Return to speaker**, often as a rounded picture-in-picture card or split screen.
- Recurring devices: highlighter swipe, hand-drawn circle, strike-through, red-pen marks, number counters, pill caption that fills as you speak, zoom-blur cuts, film borders and light leaks.

4. How to use it

Pick a style

- Check the footage: framing (close or wide), how clean the wall above the head is, set and wardrobe colours.
- Consider tone and niche.
- Shortlist 2–3 templates from the families above; confirm each one's "when to use / skip when" in the catalog.

Caption plan — one row per sentence

Time	Subtitle (small)	Hero word (big)	Hero placement	Accent / motion
0:00–0:02	"The clearest"	IDEA	behind head, top third	#FFE500 Anton, pop-in
0:02–0:04	"was hiding in"	HIDING	behind head, top third	#FFE500, pop-in
0:04–0:06	"plain sight"	SIGHT	behind head, white	plain = accent in subtitle

Mark exactly one hero per sentence, or none. Prefer nouns, verbs and numbers over filler.

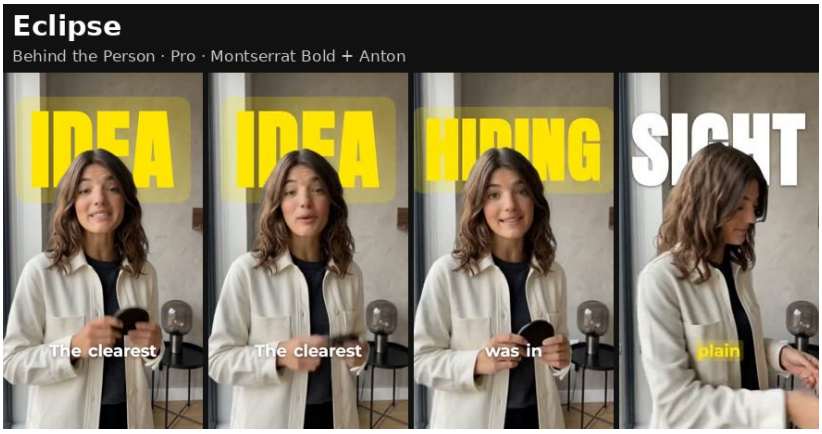

Editor brief (CapCut / Premiere)

- **Behind the person:** duplicate the clip, run background removal / auto cutout on the top copy, put the hero text layer between the two copies.
- **Two text presets:** subtitle (sentence font, white, 2–4 words) and hero (accent font, accent colour, top third).
- **Active word:** colour the spoken word with the accent, or put a box/highlight behind it.
- **Animation:** pop or scale-in for the hero, fade or typewriter for subtitles. One motion idea per template.
- **AI Edit look:** plan cutaways and board moments (lists, numbers, contrasts) in the script before editing.

Review checklist

- Too many words on screen?
- Two competing heroes at once?
- Accent colour used on non-key words?
- Text over the face or outside the safe zone?
- Hero font with no contrast against the subtitle font?

5. Catalog — Behind the Person (17)

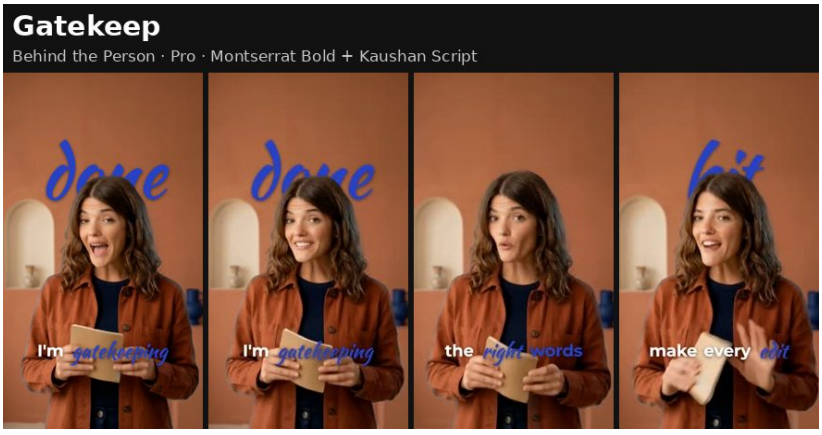

Eclipse

Key word locks behind you; subtitles ride your chest.

Fonts: Montserrat Bold + Anton
Colours: #FFFFFF #FFE500
Words on screen: Up to 4
As you speak: A colour block sits behind the spoken word
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

Use: Use Eclipse, the flagship behind-the-person style, for hooks that need one unmissable word. The key word locks behind your head in a heavy condensed face while subtitles ride your chest in front, turning a plain talking head into a poster-like frame. It suits founders, coaches and educators.
Skip: Skip it when you sit far from the camera or the background right behind your head is busy; the effect needs a clear silhouette.

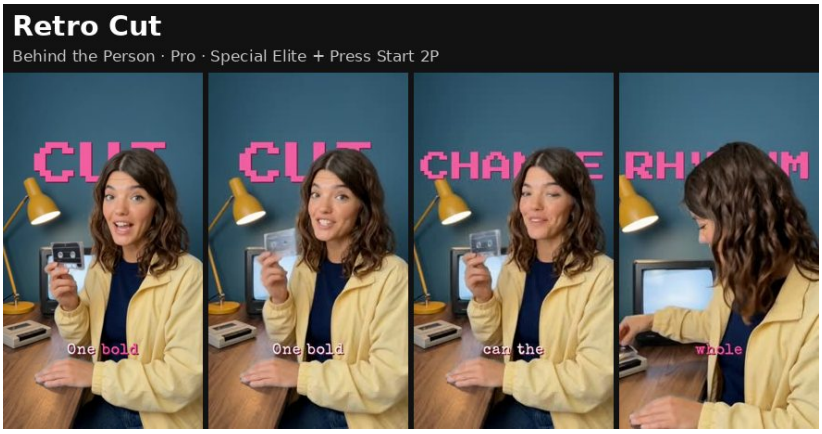

Gatekeep

White subtitles up front, a royal-blue brush-script word behind you.

Fonts: Montserrat Bold + Kaushan Script
Colours: #FFFFFF #2742C4
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

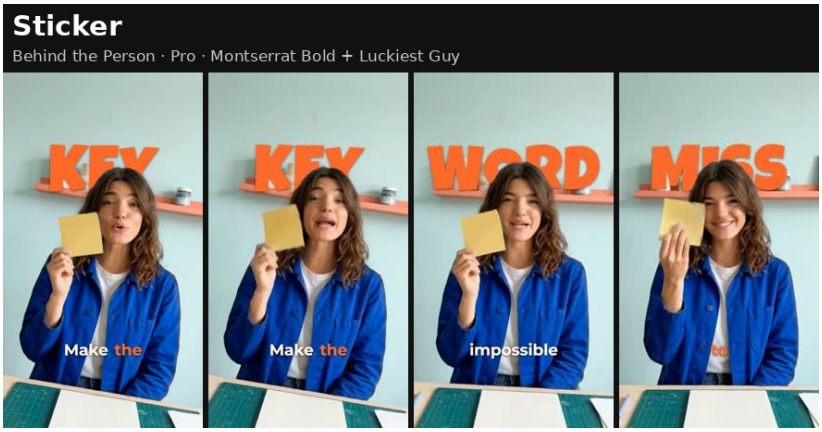

Use: Use Gatekeep for confident, personal clips: white Montserrat subtitles up front and a royal-blue Kaushan Script word behind you. The brush script adds attitude, which suits fashion, beauty, opinions and recommendation clips.
Skip: Skip it on blue backgrounds, where the hero word blends in, and for formal topics where brush script feels too casual. Like every behind-the-person style, it needs a clear silhouette.

Retro Cut

Typewriter subtitles in front, an 8-bit pixel word behind you.

Fonts: Special Elite + Press Start 2P
Colours: #F6EFE2 #F25FA0
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

Sticker

Cream subtitles in front, a chunky comic word behind you.

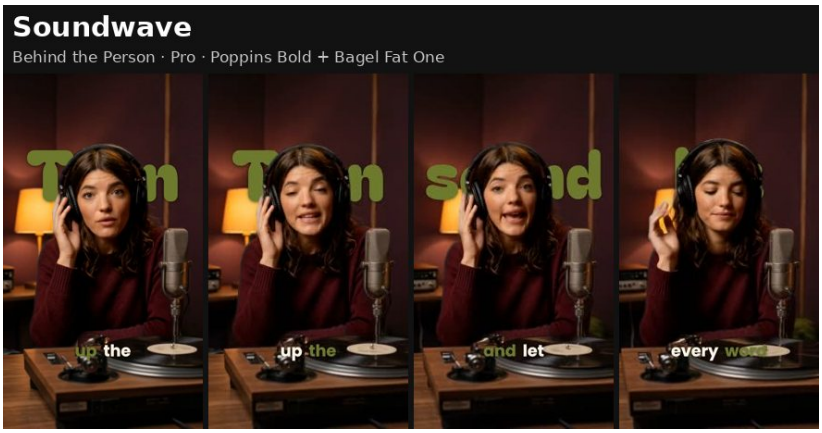

Fonts: Montserrat Bold + Luckiest Guy
Colours: #FFF1DC #FF6A2B
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

Calligraph

Soft-white subtitles, an ornate cobalt calligraphy word behind you.

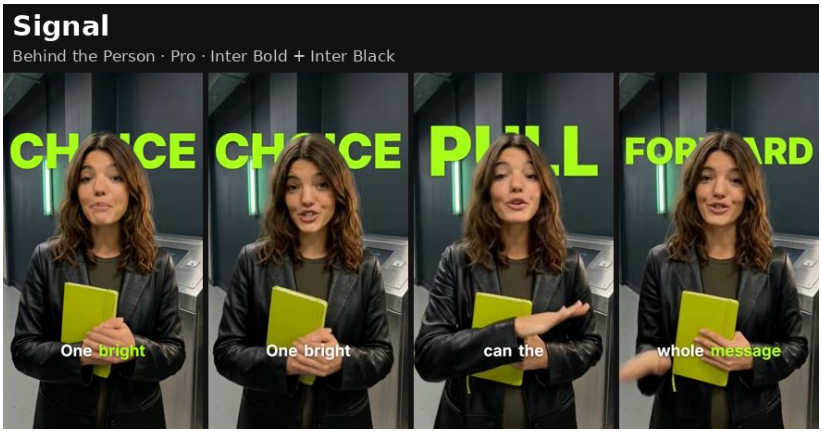

Fonts: Montserrat ExtraBold + Great Vibes
Colours: #EAF0FF #2B53D4
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

Soundwave

Warm-white subtitles in front, a fat rounded olive word behind you.

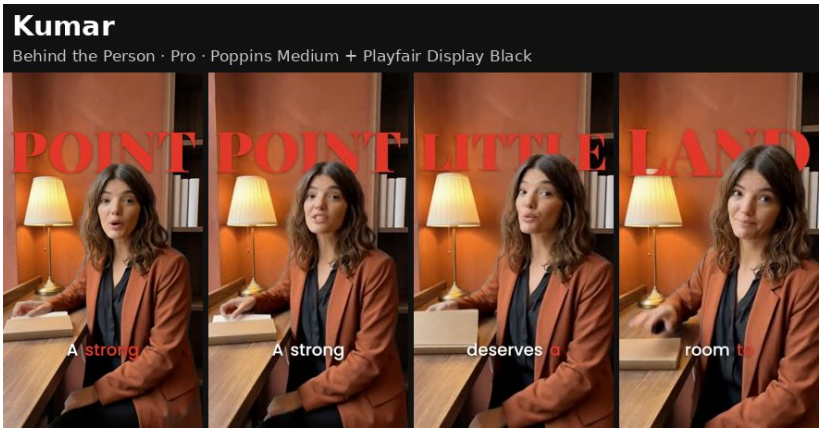

Fonts: Poppins Bold + Bagel Fat One
Colours: #FBF4E4 #6E7B2E
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

Signal

Neon-green impact word behind you, plain white subtitles in front.

Fonts: Inter Bold + Inter Black
Colours: #FFFFFF #A8FF1A
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

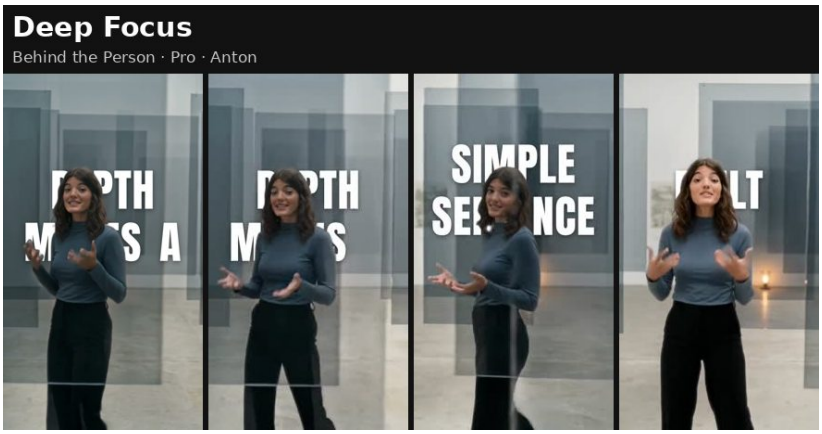

Kumar

A big red editorial serif locks behind you; clean white subtitles in front.

Fonts: Poppins Medium + Playfair Display Black
Colours: #FFFFFF #E2382A
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

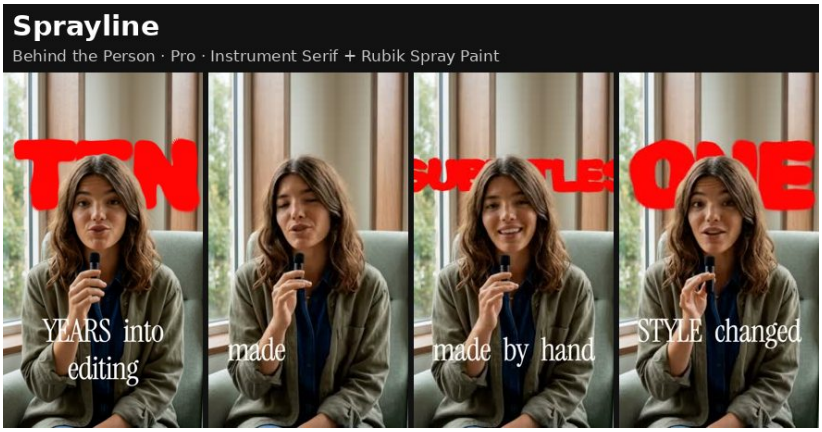

Use: Use Kumar when one word carries the clip: a verdict, a number, a name. The red Playfair Display hero sits behind your head like a magazine cover line, while Poppins subtitles in front keep the sentence easy to read. It suits founders, commentators and explainers who speak in deliberate beats.
Skip: Skip it for dense, rapid delivery: only one hero per clip gets the treatment, and the cutout needs head-and-shoulders framing with room above you.

Deep Focus

Text sits in real 3D space behind you.

Fonts: Anton
Colours: #FFFFFF
Words on screen: Up to 2
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

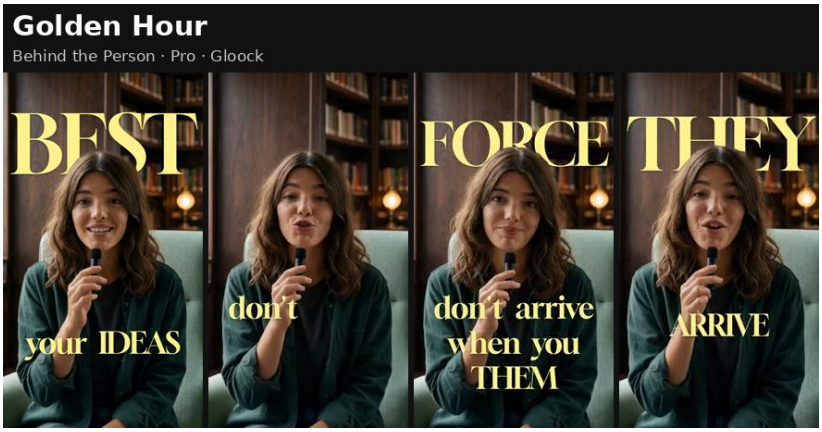

Sprayline

A red spray-painted phrase fills the frame behind clean serif captions.

Fonts: Instrument Serif + Rubik Spray Paint
Colours: #FFFFFF #FF0503
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

Use: Use Sprayline when a phrase deserves street-art energy. A red spray-painted phrase fills the frame behind you while clean Instrument Serif captions sit in front. The contrast between rough and refined suits music, fashion, culture commentary and bold personal statements.
Skip: Skip it for corporate or calm educational clips, and when the wall behind your head is red or very busy.

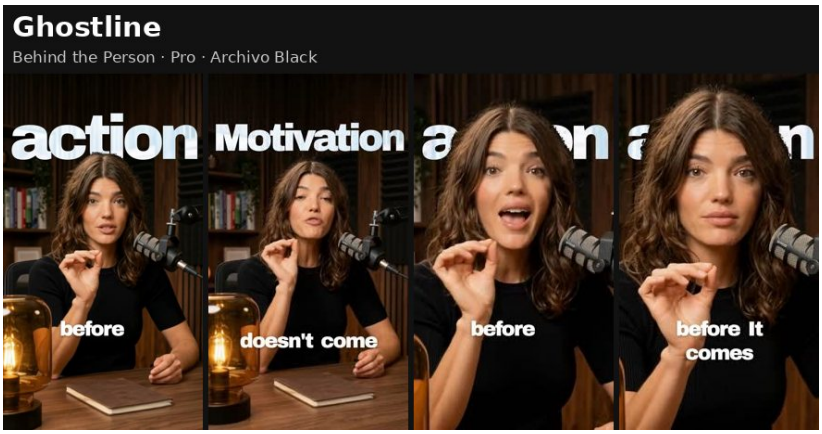

Golden Hour

Large pale-yellow editorial words frame a smaller matching subtitle.

Fonts: Gloock
Colours: #FFF18F
Words on screen: Up to 3
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

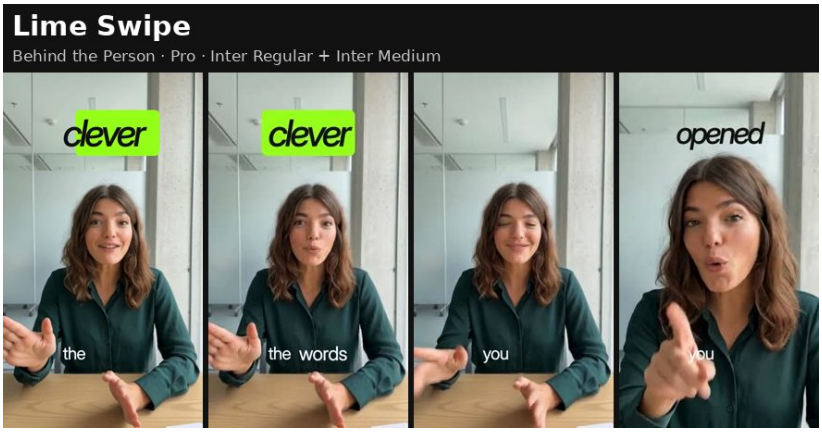

Use: Use Golden Hour for warm, reflective clips: advice, storytelling, coaching, book and podcast takes. Large pale-yellow Gloock serif words frame the key idea behind your head, with a smaller matching subtitle in front, so the frame reads as one editorial layout rather than text laid over video.
Skip: Skip it on pale or washed-out backgrounds, where light yellow fades, and when the clip needs a heavy sans for speed.

Ghostline

A dense white headline cuts through the subject above a compact subtitle.

Fonts: Archivo Black
Colours: #FFFFFF
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

Lime Swipe

A black italic phrase slides across a sharp lime plate.

Fonts: Inter Regular + Inter Medium
Colours: #FFFFFF #121212
Words on screen: Up to 4
As you speak: A colour block sits behind the spoken word
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

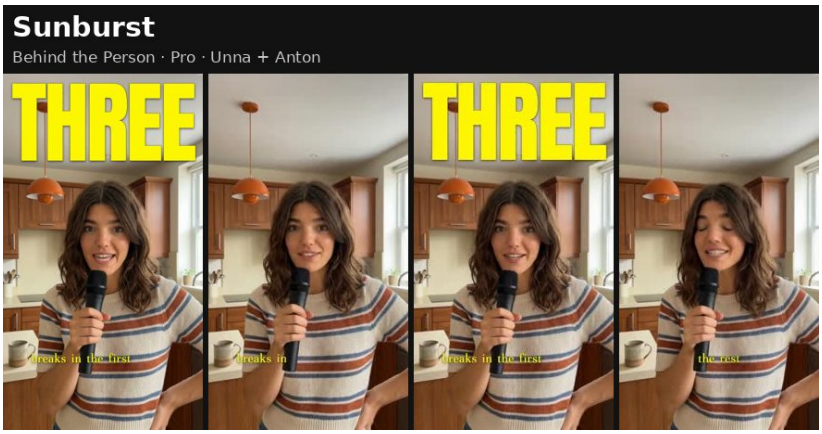

Monument

A lime uppercase hit drops above a loose handwritten subtitle.

Fonts: Gloria Hallelujah + Anton
Colours: #FFFFFF #96FF1A
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

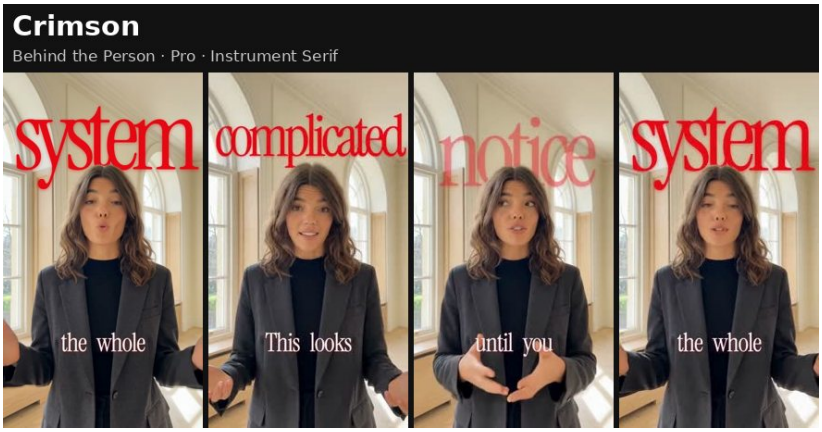

Use: Use Monument when one word should hit hard above a casual line. A lime uppercase Anton word drops behind you while a loose handwritten subtitle in Gloria Hallelujah carries the sentence. The mix suits motivation, fitness, creator-economy and opinion clips.
Skip: Skip it on green or lime-heavy backgrounds, where the hero blends in, and for formal topics where handwriting feels too casual. The word also needs headroom to drop behind you.

Sunburst

A bright yellow headline bounces behind a small serif subtitle.

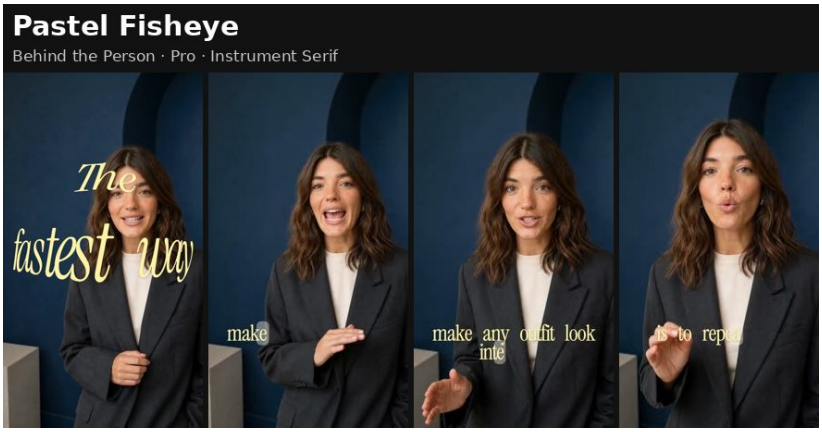

Fonts: Unna + Anton
Colours: #FFF600
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

Crimson

A red editorial phrase sits behind a soft-white matching subtitle.

Fonts: Instrument Serif
Colours: #EEEEEE #E50914
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

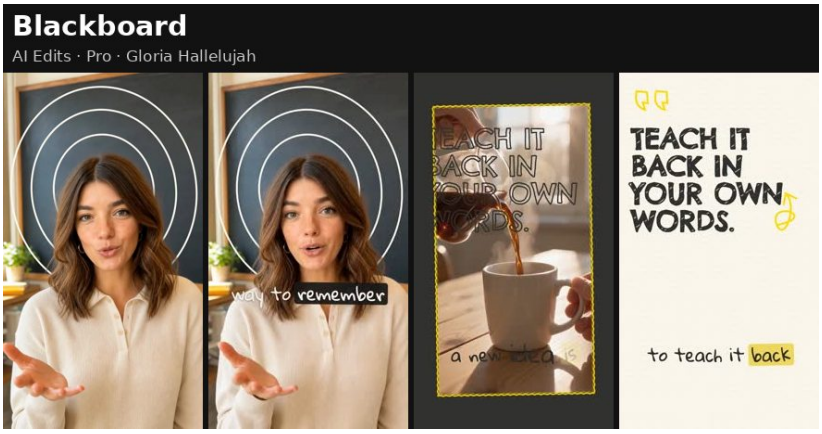

Pastel Fisheye

Pastel editorial type bends around you with a fisheye lens.

Fonts: Instrument Serif
Colours: #FFF3A8
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Pro

5. Catalog — AI Edits (35)

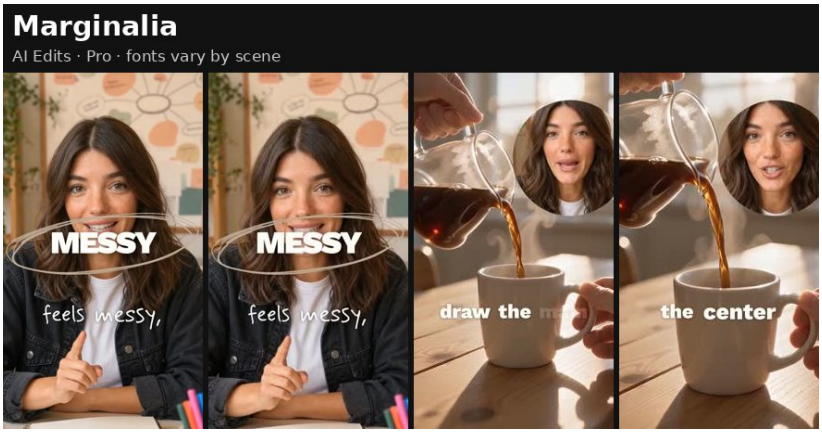

Blackboard

Handwritten caption chips, rear chalk words, and heavy outline hits.

Fonts: Gloria Hallelujah
Colours: #FFD400
Words on screen: Up to 4
As you speak: A colour block sits behind the spoken word
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

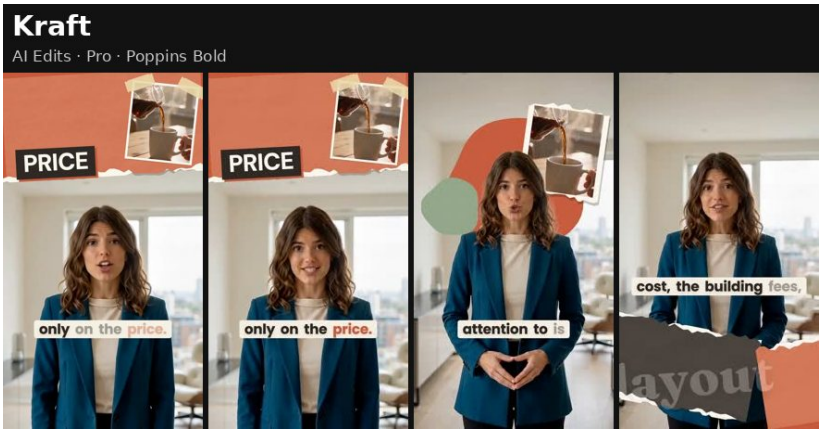

Use: Use Blackboard, an AI Edit, for explainers that benefit from a teacher's board. Handwritten caption chips, chalk words drawn behind you and heavy outline hits are generated to match what you say. It suits lessons, frameworks, study tips and anything you would normally sketch on a whiteboard.
Skip: Skip it for lifestyle or glamour footage, where a classroom look clashes. Applying an AI Edit generates the treatment and uses AI credits.

Marginalia

Handwritten captions, circled keywords, and a notebook layout for every section.

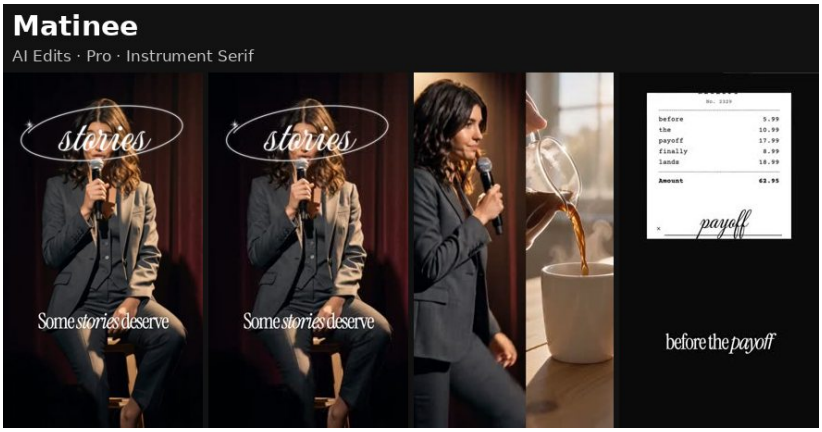

Fonts: varies by scene
Colours: #FFFDF8
Words on screen: Up to 6
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Kraft

Warm paper collage: torn strips, tape labels, and a pill caption that fills as you speak.

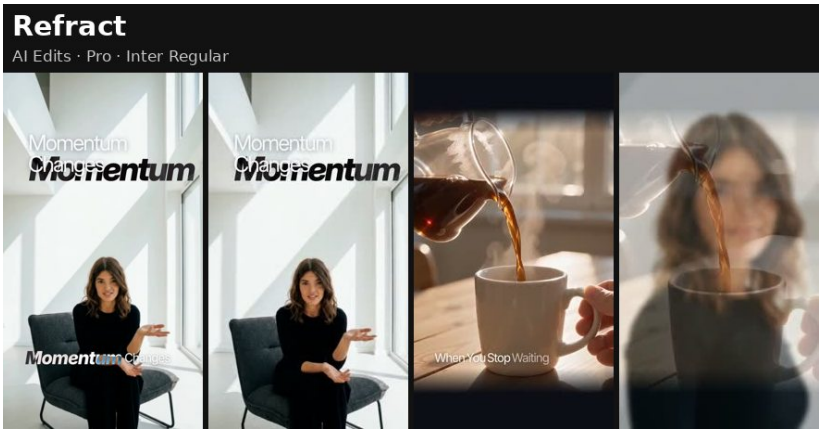

Fonts: Poppins Bold
Colours: #2D2622 #C65A3A
Words on screen: Up to 4
As you speak: The spoken word sits in a box
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Matinee

Cinematic serif captions, script film titles, and soft split screens.

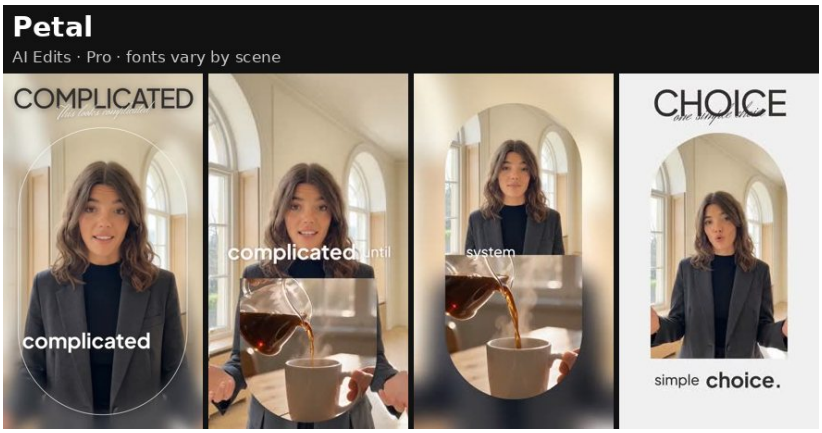

Fonts: Instrument Serif
Colours: #FFFFFF
Words on screen: Up to 5
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Refract

Words that build in, one huge chrome word, and zoom-blur cuts.

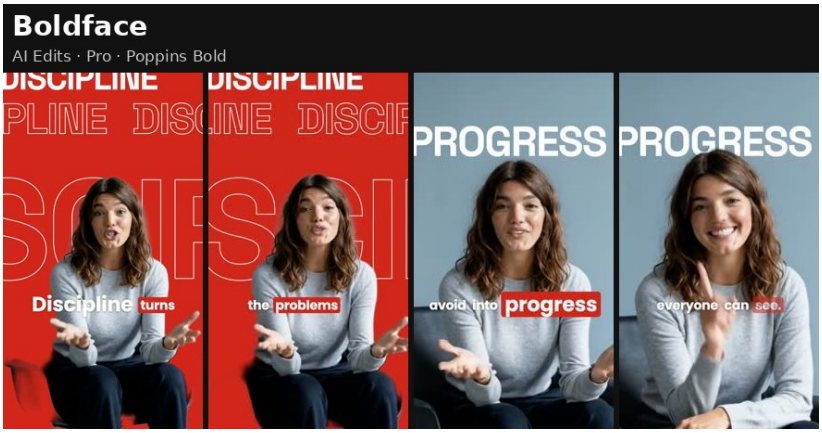

Fonts: Inter Regular
Colours: #FFFFFF
Words on screen: Up to 5
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Petal

Soft editorial captions, arch frames, and caps titles crossed by script.

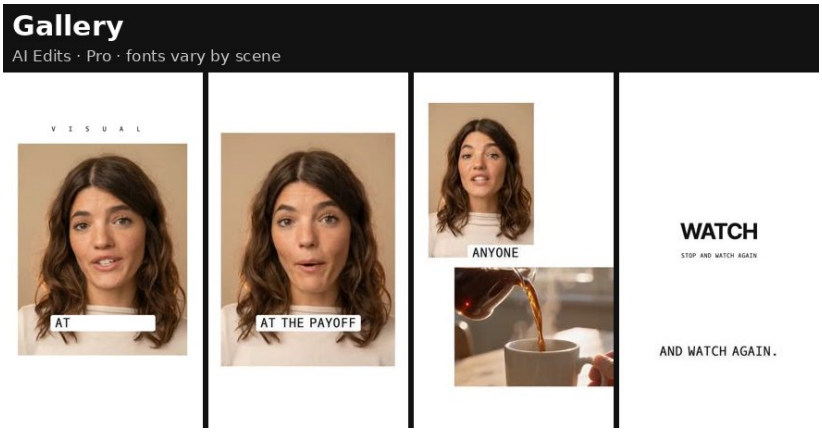

Fonts: varies by scene
Colours: #FFFFFF
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Boldface

Bold captions with a boxed word, rounded video cards, and giant scrolling type.

Fonts: Poppins Bold
Colours: #FFFFFF
Words on screen: Up to 3
As you speak: A colour block sits behind the spoken word
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Gallery

Swiss-minimal mono captions in a white label, and edge-aligned frames.

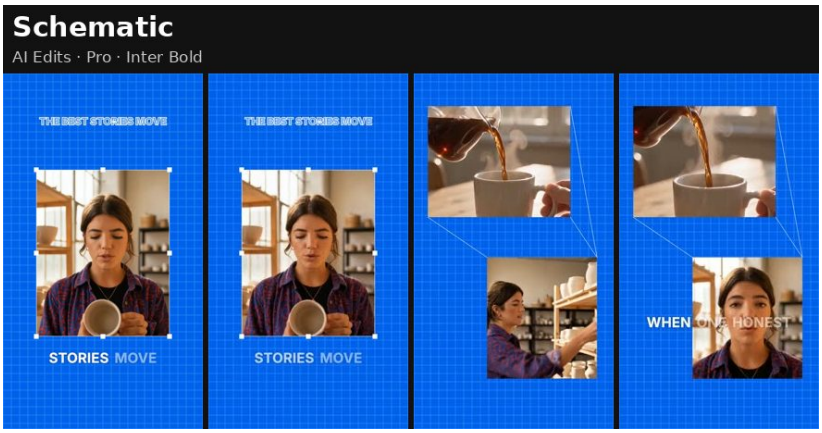

Fonts: varies by scene
Colours: #141414
Words on screen: Up to 3
As you speak: The spoken word sits in a box
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Dossier

Documentary caps that fill as they are spoken, stacked hooks, and push cuts.

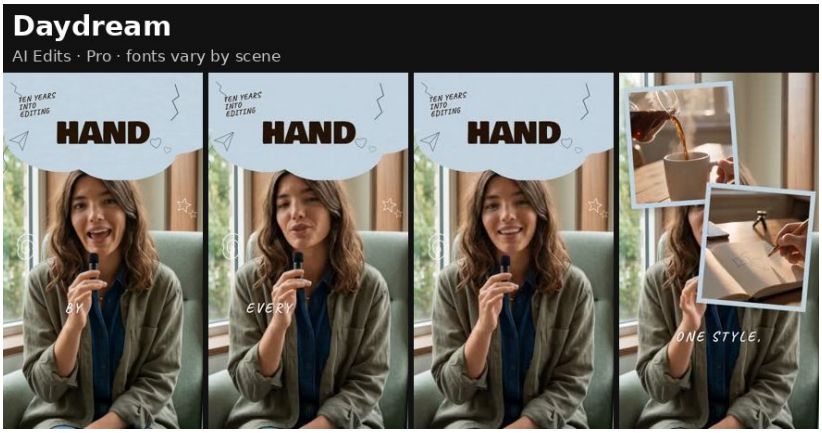

Fonts: Bebas Neue
Colours: #FFFFFF
Words on screen: Up to 3
As you speak: Upcoming words are outlines that fill as they are spoken
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Schematic

Bold caps with an underlined key word, graph paper, and selection boxes.

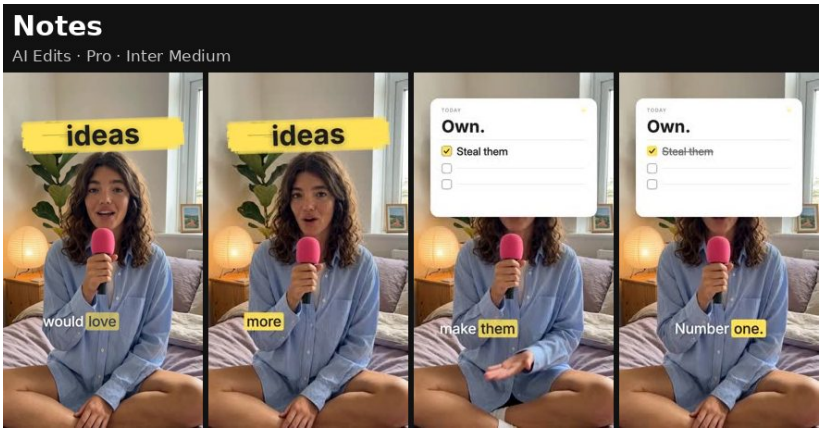

Fonts: Inter Bold
Colours: #FFFFFF
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Daydream

Hand-lettered caps, paper clouds, pencil doodles, and collage.

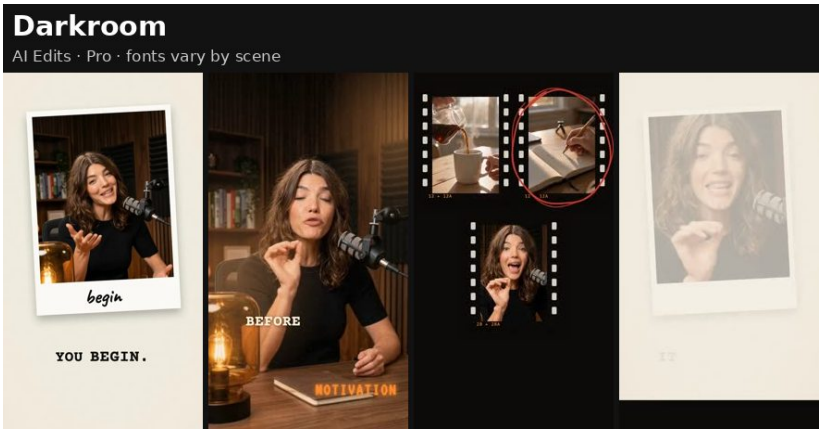

Fonts: varies by scene
Colours: #FFFFFF
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Notes

Highlighter captions, ticking note cards, screenshots and scribbles.

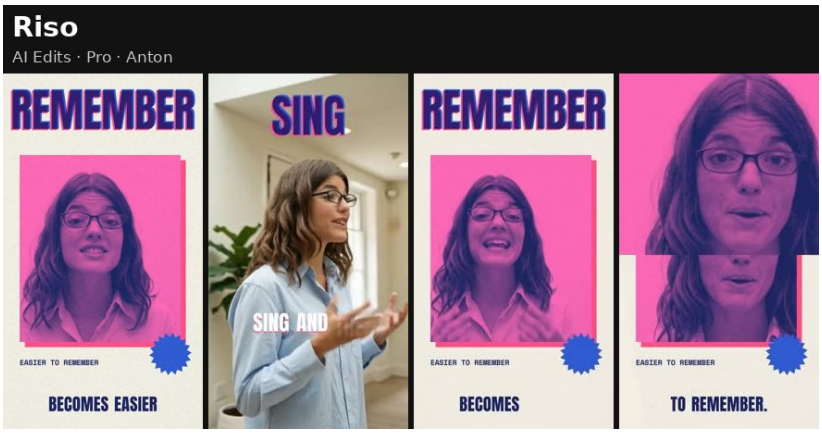

Fonts: Inter Medium
Colours: #FFFFFF #FFE15A
Words on screen: Up to 4
As you speak: A colour block sits behind the spoken word
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Darkroom

Typed warm captions, film frames, light leaks and a date stamp.

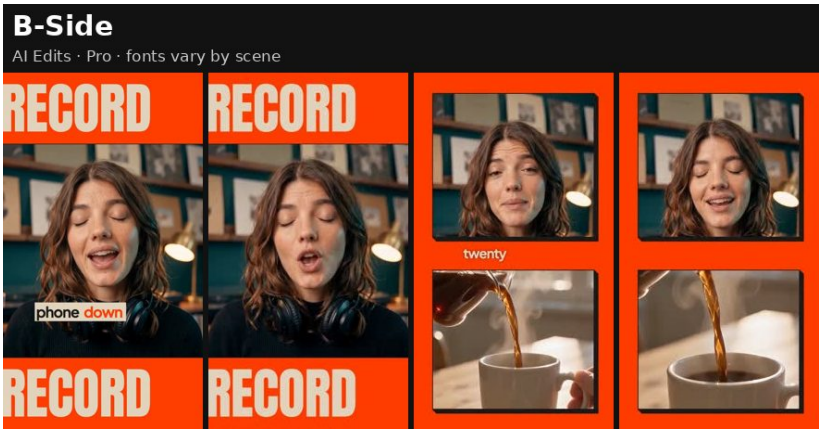

Fonts: varies by scene
Colours: #FFF3DC
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Riso

Two-ink duotone prints, misregistered titles, halftone and stickers.

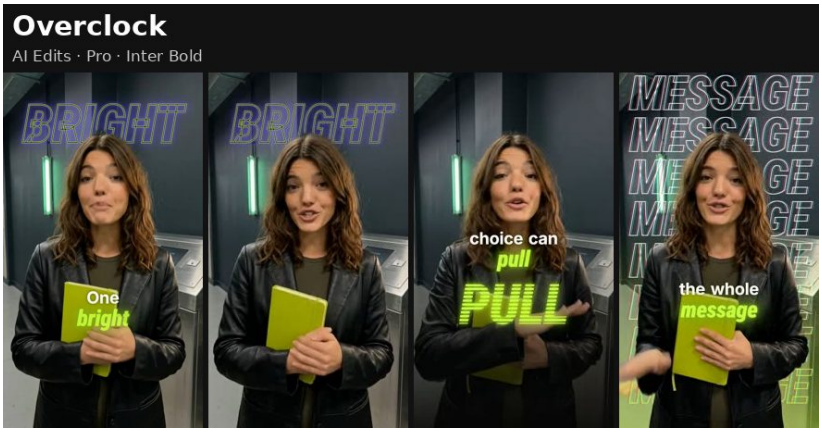

Fonts: Anton
Colours: #FFFFFF
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

B-Side

Cream label captions, poster bands, and long-shadow cards on a mustard sleeve.

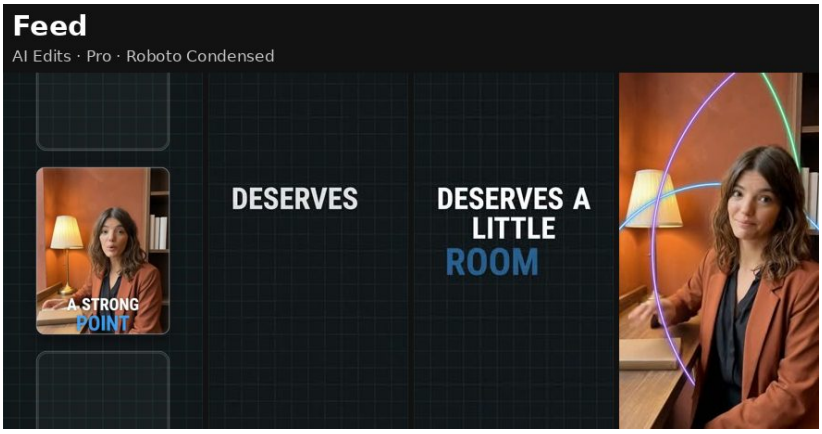

Fonts: varies by scene
Colours: #1C1A18 #FF3C00
Words on screen: Up to 4
As you speak: The spoken word sits in a box
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Overclock

Lime italic keywords, outlined caps behind you, scanlines and a viewfinder.

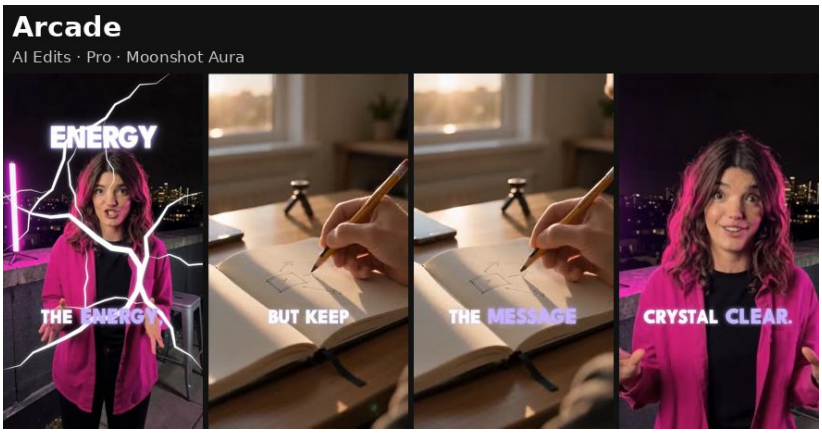

Fonts: Inter Bold
Colours: #FFFFFF
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Feed

Condensed caps with a blue keyword, glass cards that scroll into place, bokeh and neon.

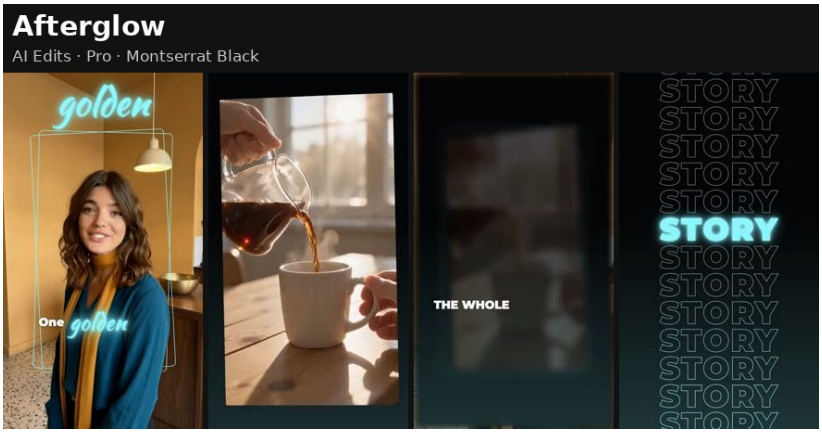

Fonts: Roboto Condensed
Colours: #FFFFFF
Words on screen: Up to 6
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Arcade

Glowing neon caps, lightning hooks, kaleidoscope cuts and bloomed B-roll.

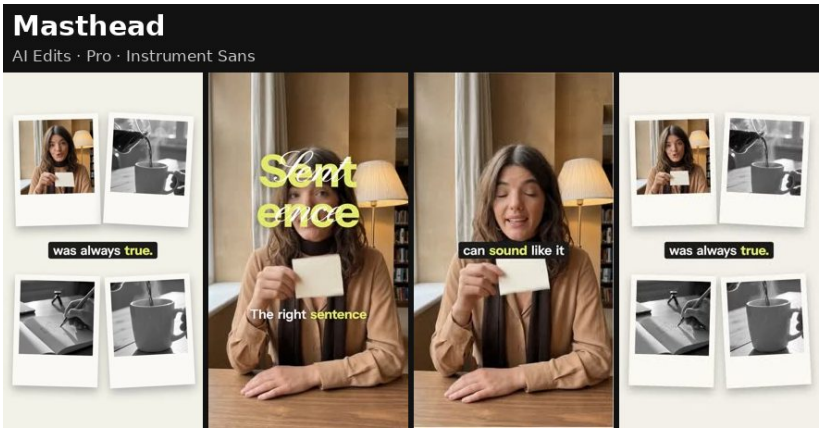

Fonts: Moonshot Aura
Colours: #FFFFFF
Words on screen: Up to 2
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Afterglow

Wide caps with a glowing cyan script, tilted frames, cover flow and light beams.

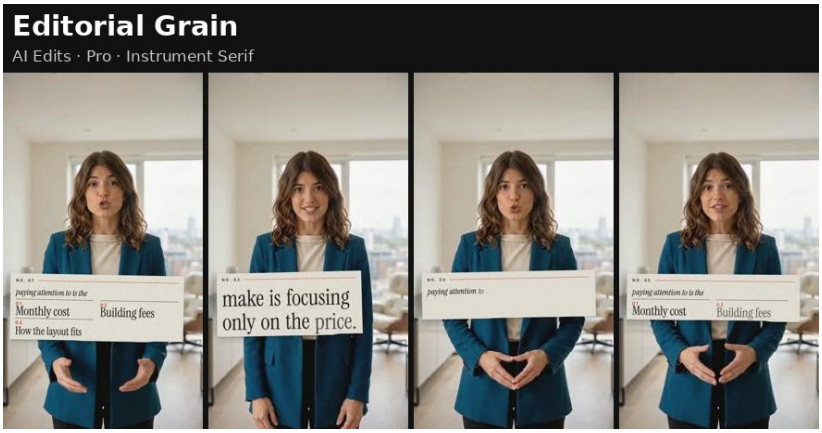

Fonts: Montserrat Black
Colours: #FFFFFF
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Masthead

Editorial captions with a yellow keyword, cover lines, spreads and instant prints.

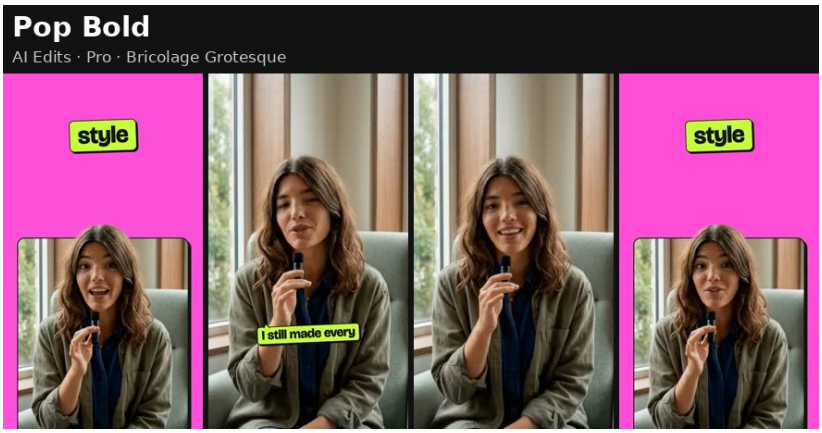

Fonts: Instrument Sans
Colours: #FFFFFF
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Editorial Grain

Serif magazine pages above your head, a red pen on contrasts, lists and numbers, and fine grain.

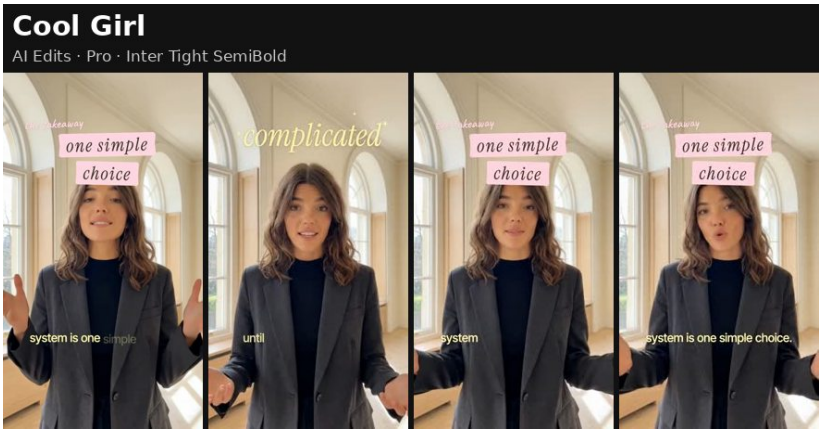

Fonts: Instrument Serif
Colours: #1A1A1A #C2412D
Words on screen: Up to 7
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Pop Bold

Chunky lime captions, neon blocks for every number, list and question, and a pop-up card on close-ups.

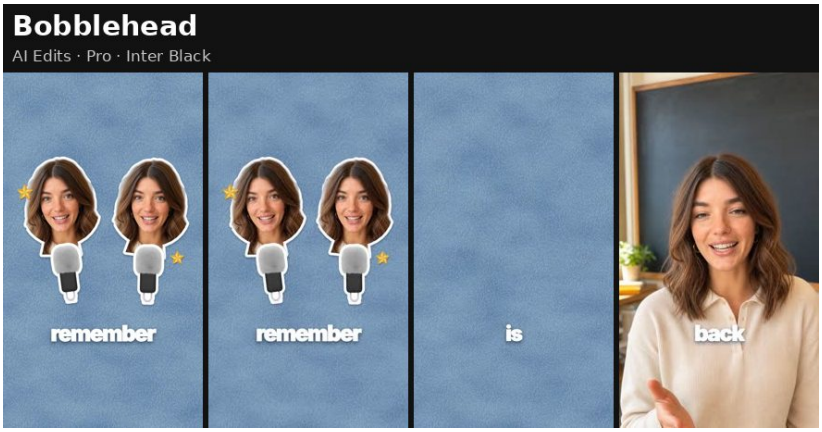

Fonts: Bricolage Grotesque
Colours: #111111
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Cool Girl

Soft butter captions, serif-italic titles for your numbers, lists and questions, a handwritten note.

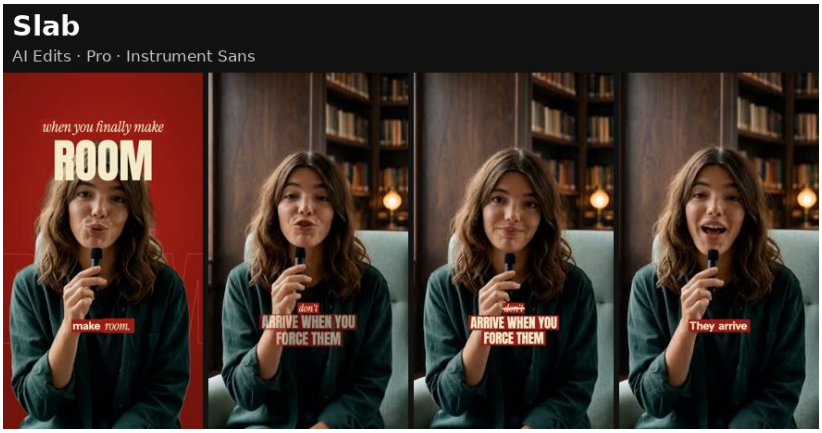

Fonts: Inter Tight SemiBold
Colours: #FFF3A8 #FFD6E0
Words on screen: Up to 5
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Bobblehead

Your head as a bobbling sticker with a giant mic, sticker labels for every number and list, on denim.

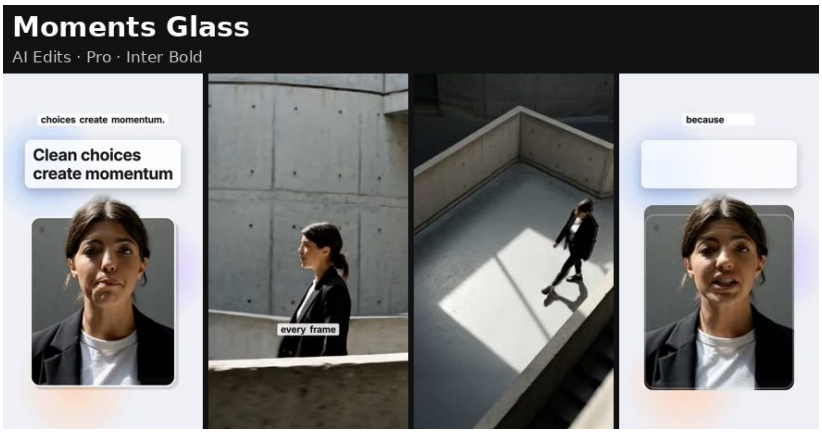

Fonts: Inter Black
Colours: #FFFFFF
Words on screen: Up to 1
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Slab

Brick tape captions, giant words that slip behind you, strikes, stamps and a counter.

Fonts: Instrument Sans
Colours: #F6EBC8
Words on screen: Up to 3
As you speak: The spoken word sits in a box
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Moments Glass

Frosted cards land on the word: counts that roll, lists that tick, contrasts that strike.

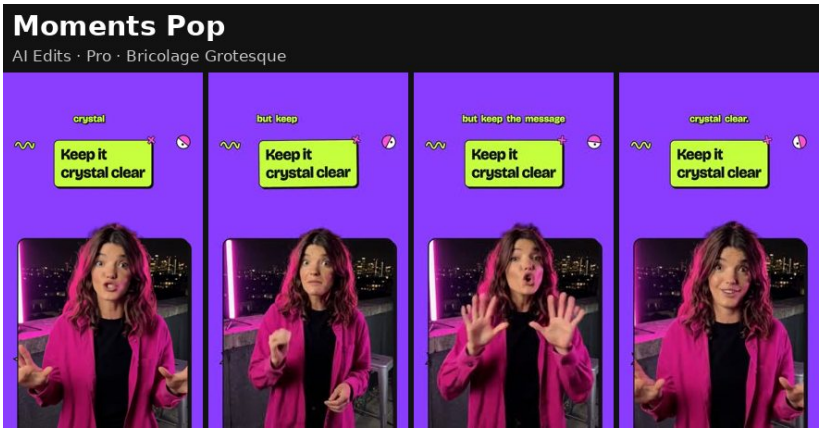

Fonts: Inter Bold
Colours: #1D1D1F
Words on screen: Up to 4
As you speak: The spoken word sits in a box
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Moments Grain

Paper-slip cards in a serif with red marks, landing on the word.

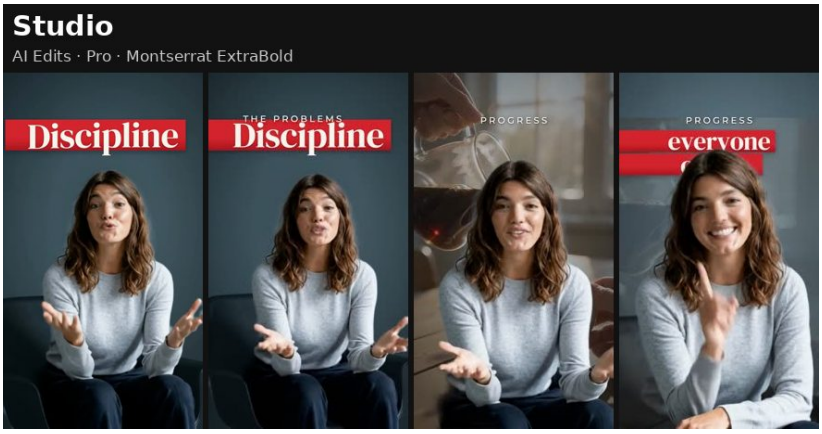

Fonts: Instrument Serif
Colours: #1A1A1A #C2412D
Words on screen: Up to 4
As you speak: The spoken word sits in a box
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Moments Pop

Bold lime and pink cards with ink outlines and stickers, landing on the word.

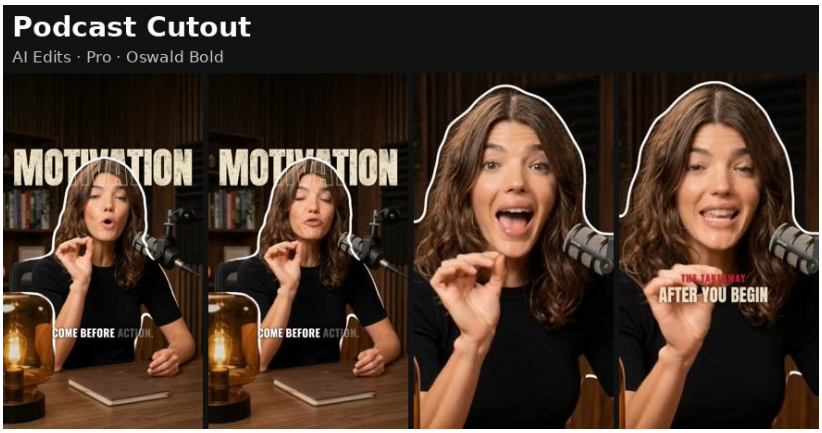

Fonts: Bricolage Grotesque
Colours: #FFFFFF #C6FF3D
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Studio

A dark room and a lit speaker: tracked caps over big serif words on a red bar, behind your head.

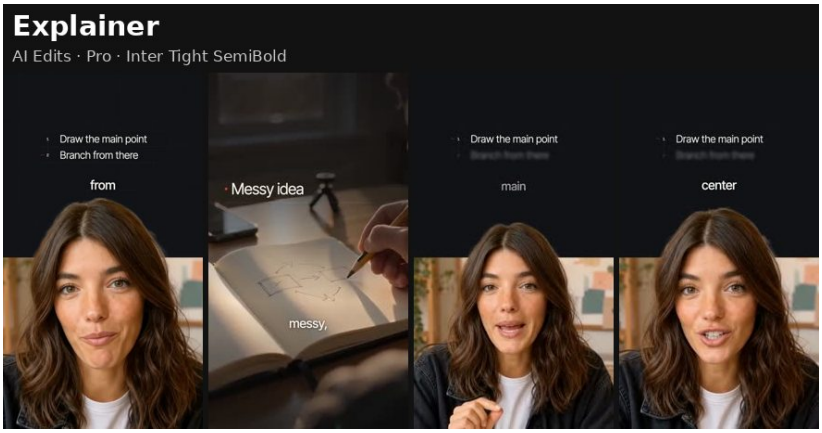

Fonts: Montserrat ExtraBold
Colours: #F7F4EE
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Podcast Cutout

You cut out on black with a white ring, giant words behind your head and a red banner.

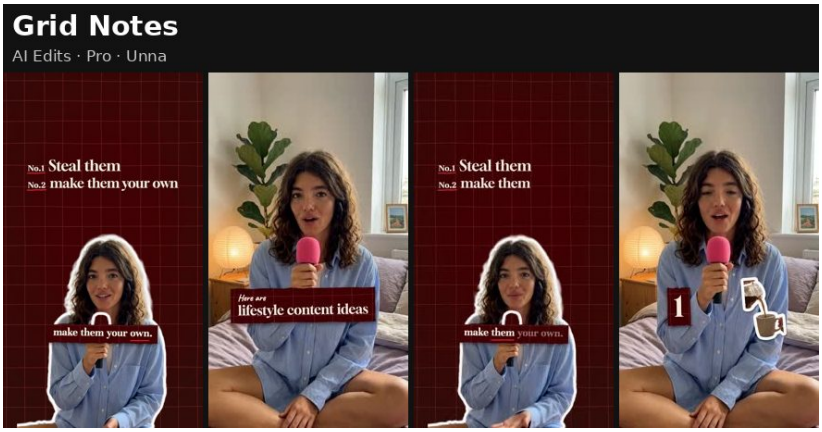

Fonts: Oswald Bold
Colours: #FFFFFF
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Explainer

A teacher's board: you drop into the bottom half as the board opens above your head.

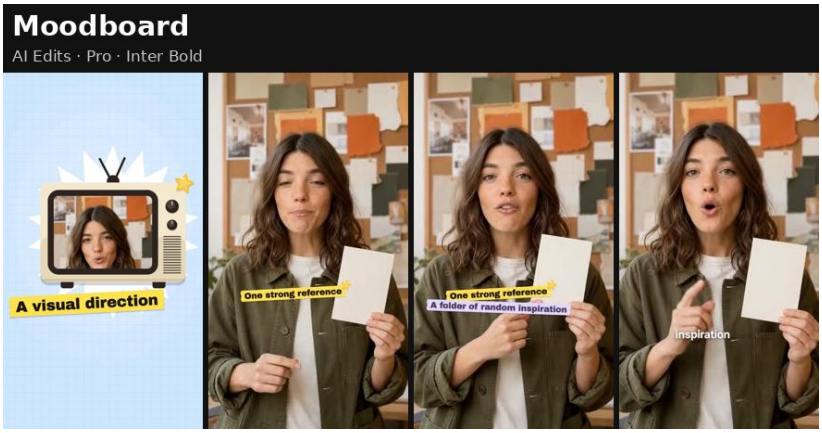

Fonts: Inter Tight SemiBold
Colours: #F2EFE8
Words on screen: Up to 1
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** yes · **Plan:** Pro

Grid Notes

Serif notes on maroon grid paper, marks in your captions, and you as a sticker on the board.

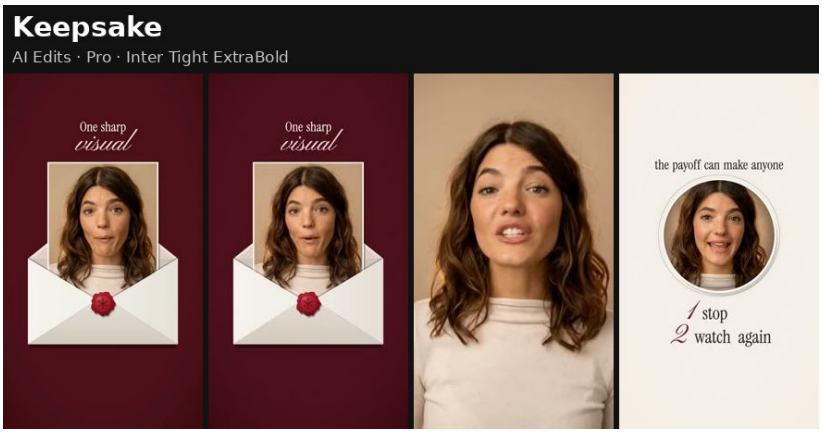

Fonts: Unna
Colours: #F6EEDF
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Moodboard

Tape, pinned tags and stickers land on the word; lists and definitions pinned on a pastel board.

Fonts: Inter Bold
Colours: #FFFFFF
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Keepsake

Soft print moments in serif and script, a letter in an envelope with a wax seal, an ornate frame.

Fonts: Inter Tight ExtraBold
Colours: #2A2321 #7A1E2C
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

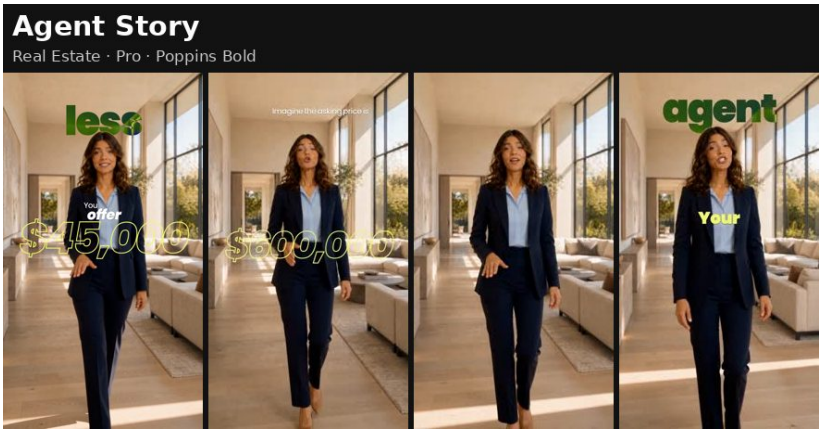

Cutout Board

Green graph paper, a traced cutout, and mixed paper-label captions around you.

Fonts: Instrument Serif + BBH Bartle
Colours: #FFFFFF #171816
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

5. Catalog — Real Estate (4)

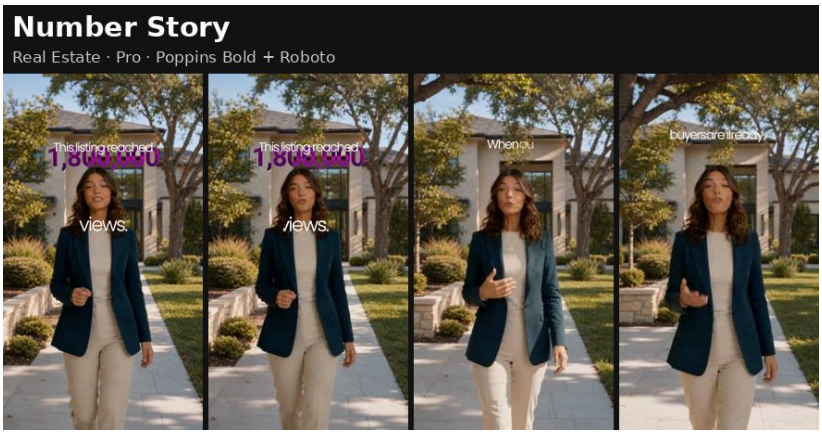

Agent Story

Big yellow headlines, outlined amounts, glowing icons, and small spoken captions.

Fonts: Poppins Bold
Colours: #FFFFFF #F1F66F
Words on screen: Up to 16
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

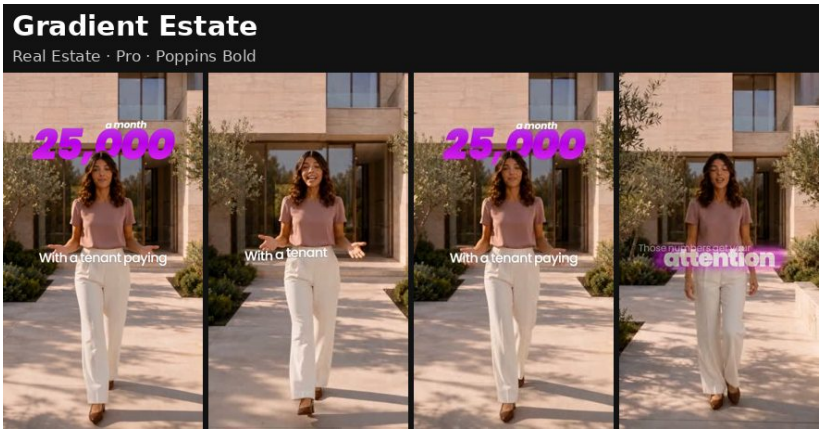

Use: Use Agent Story for listing tours and market updates. Big yellow headlines, outlined amounts and glowing icons land as you mention prices, rooms and sizes, with small spoken captions underneath. It is built for agents and property creators who walk through a space while talking.
Skip: Skip it outside property content; the treatment expects numbers and listing details to emphasise. Applying it generates the edit and uses AI credits.

Number Story

Statistics count up beside sliding captions and your screenshot cards.

Fonts: Poppins Bold + Roboto
Colours: #FFFFFF #EC00B5
Words on screen: Up to 16
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

Gradient Estate

Outlined amounts, bold magenta words, and montages of your property photos.

Fonts: Poppins Bold
Colours: #FFFFFF #EC00B5
Words on screen: Up to 16
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

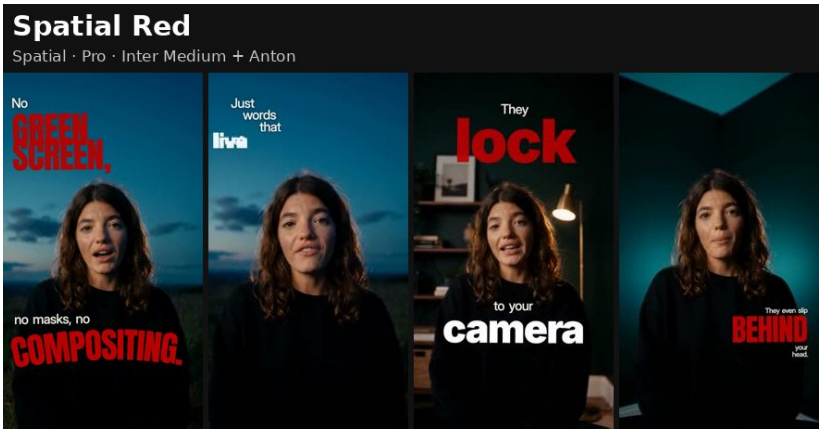

Dimension Story

Rising, bouncing phrases, raised lettering, and colorful words layered around you.

Fonts: Poppins Bold
Colours: #FFFFFF #EC00B5
Words on screen: Up to 16
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** yes · **Plan:** Pro

5. Catalog — Spatial (3)

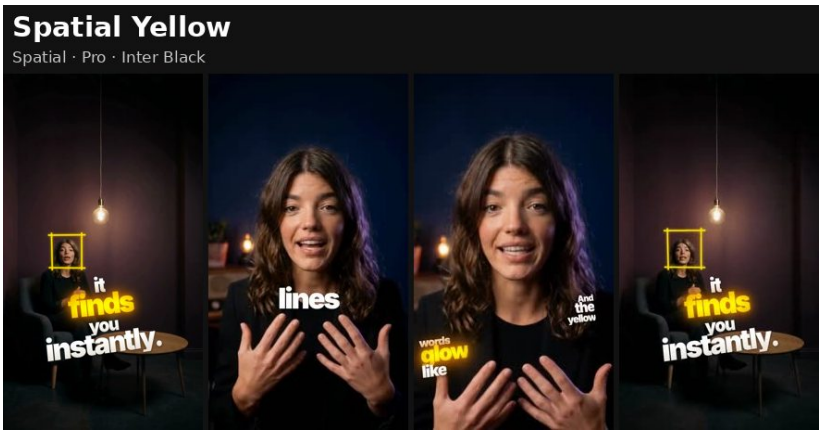

Spatial Red

Small warm words and huge red uppercase heroes posted around your shot, tracked to the camera.

Fonts: Inter Medium + Anton
Colours: #FFF8EE #B90000
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

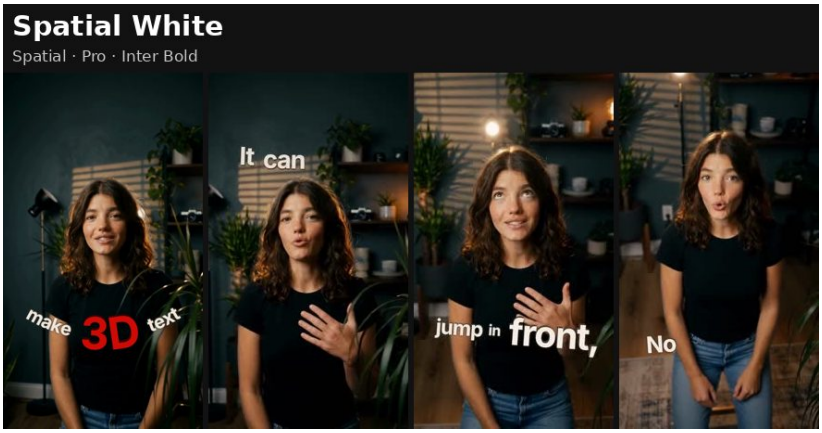

Use: Use Spatial Red when the camera moves. Small warm words and huge red uppercase heroes are posted around your shot in 3D and tracked to the camera, so they stay put as you walk or pan. It suits travel, walk-and-talks, events and outdoor clips.
Skip: Skip it for locked-off desk shots, where 3D placement adds little, and for tight framing with no room around you.

Spatial Yellow

Heavy white lines build around you while glowing yellow words slide in; plain words come one at a time.

Fonts: Inter Black
Colours: #FFFFFF #FFE000
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

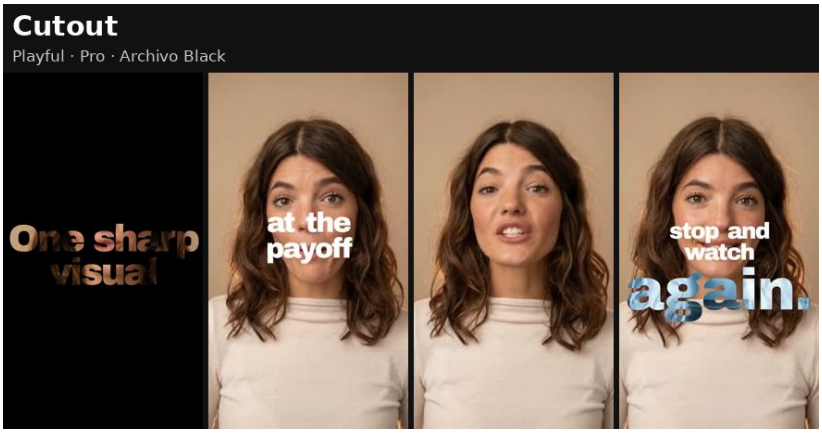

Spatial White

Words arc over your head and across your chest in 3D; the red one lands biggest.

Fonts: Inter Bold
Colours: #F6EDE2 #D00A07
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

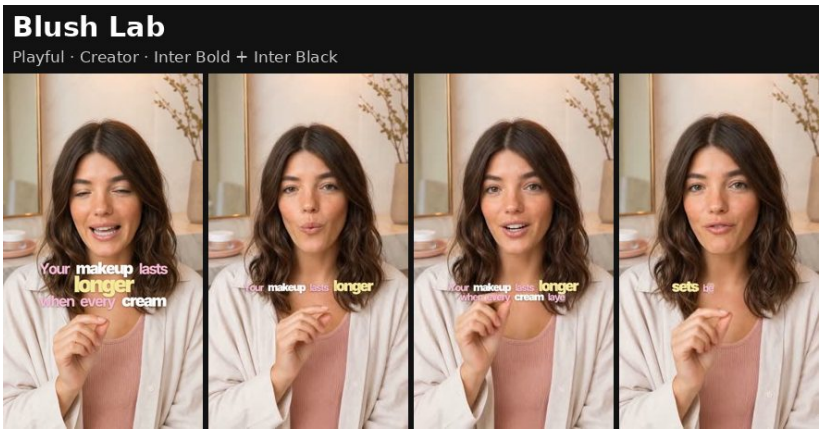

5. Catalog — Playful (6)

Cutout

Large centered phrases build across two rows with an inverted hero word.

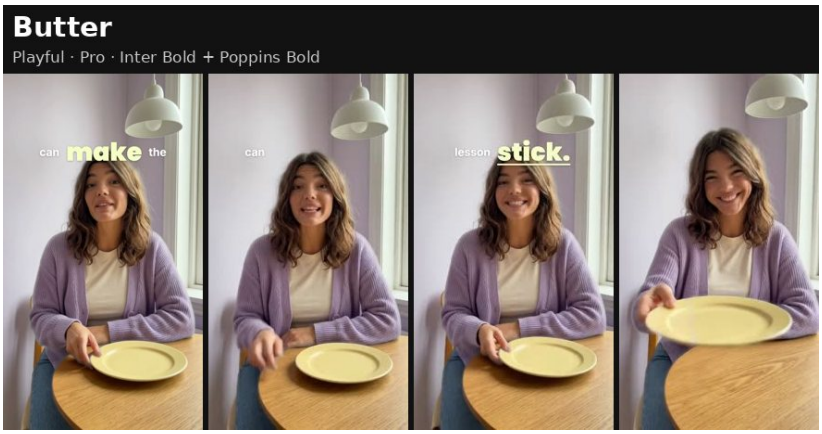

Fonts: Archivo Black
Colours: #FFFFFF
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Pro

Blush Lab

Tight blush captions type across two rows, then land on one butter word.

Fonts: Inter Bold + Inter Black
Colours: #F7B8D2 #FFFFFF
Words on screen: Up to 8
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

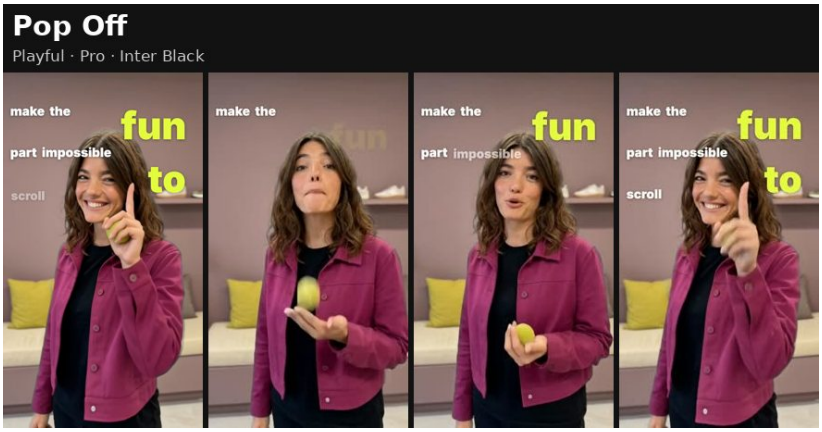

Butter

Tiny white asides up top; big butter-yellow words lock behind you.

Fonts: Inter Bold + Poppins Bold
Colours: #FFFFFF #F6FBC5
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

Use: Use Butter for soft, friendly clips. Tiny white asides sit up top while big butter-yellow words lock behind you. The warm colour and gentle scale suit lifestyle, food, home and wellness creators who want a playful frame that still feels calm.
Skip: Skip it on yellow or cream backgrounds, where butter yellow disappears, and when you need a hard-edged, high-contrast look.

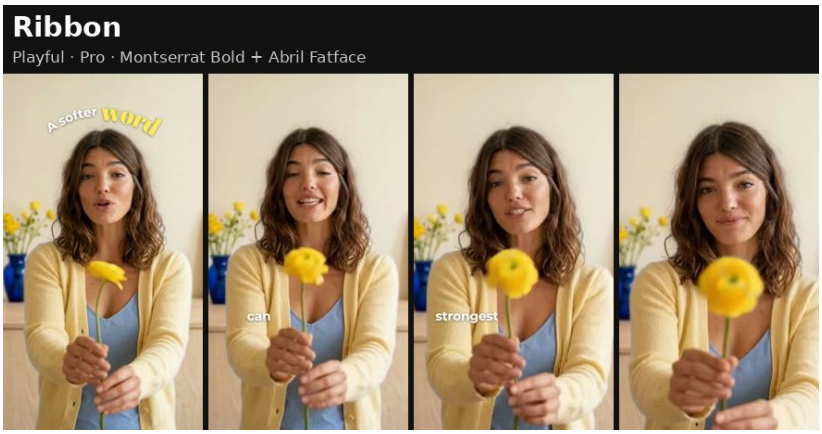

Pop Off

One font, two colors: small white asides, big chartreuse hits around you.

Fonts: Inter Black
Colours: #FFFFFF #E3FC3E
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

Use: Use Pop Off when the clip should feel playful but stay readable. One font in two colours places small white asides and big chartreuse hits around you, with some words tucked behind you, so your face stays clear. It suits lifestyle, comedy, food and everyday creator chat.
Skip: Skip it for formal or financial content, and for footage where you fill the frame edge to edge; the words need space around you.

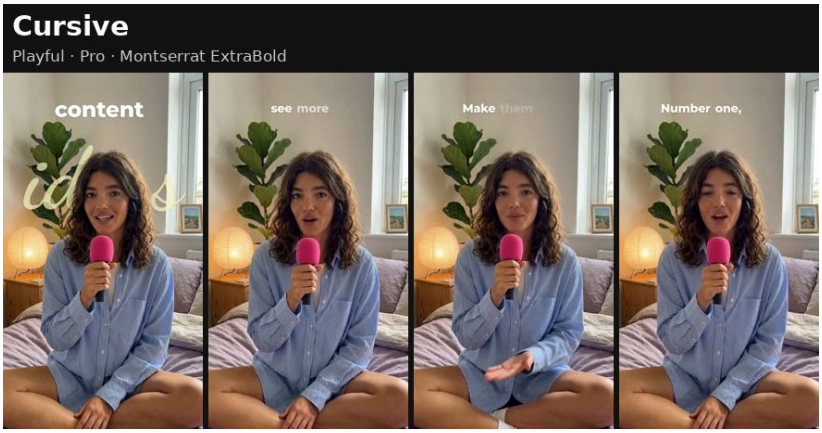

Ribbon

A mix: words curve over you, sit in front, or lock behind you.

Fonts: Montserrat Bold + Abril Fatface
Colours: #FFFFFF #FFE451
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

Use: Use Ribbon for gentle, personal clips. Words curve over your head, sit in front or lock behind you, in Montserrat Bold with an Abril Fatface accent. The mix of placements keeps a slower talking head visually alive without heavy motion, which suits wellness, beauty, relationships and storytelling.
Skip: Skip it for fast delivery or dense information; curved text reads more slowly than a straight line.

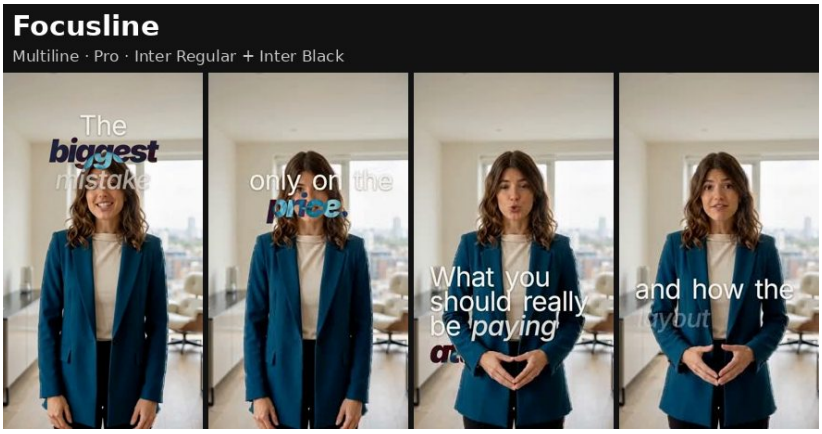

Cursive

Butter script + rounded heroes around you; tiny white ticker up top.

Fonts: Montserrat ExtraBold
Colours: #FFFFFF #F4F1BE
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

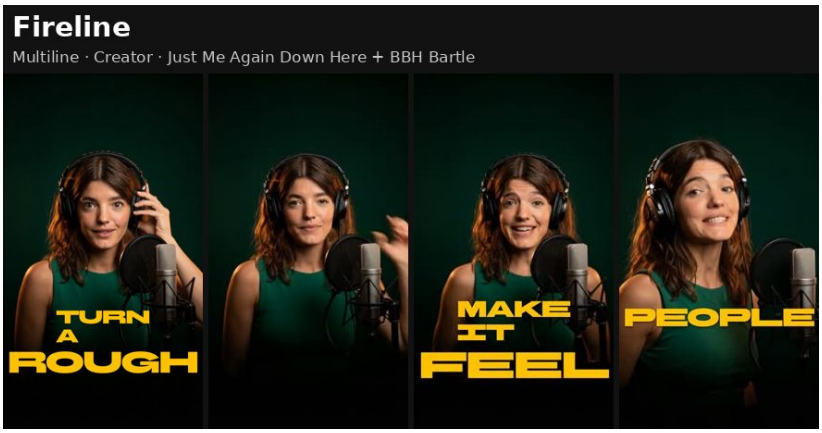

5. Catalog — Multiline (10)

Focusline

Editorial caption lockups that respond to each spoken idea.

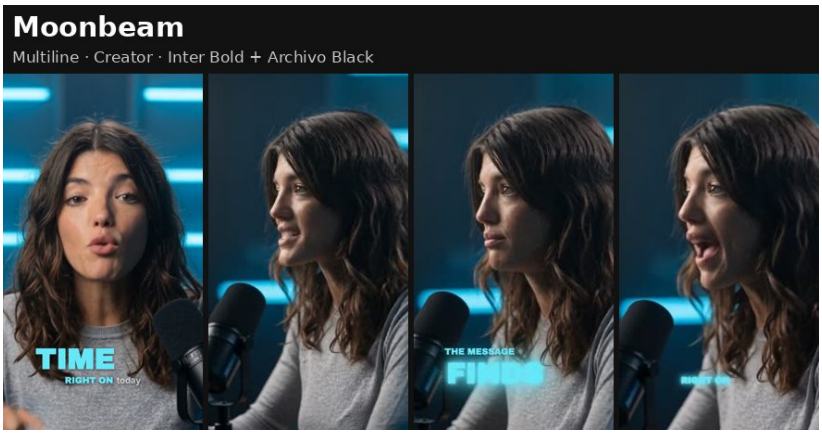

Fonts: Inter Regular + Inter Black
Colours: #F3F0EA #9BCDD0
Words on screen: Up to 7
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** no ·
Plan: Pro

Fireline

Handwritten white lines build into a rising yellow title.

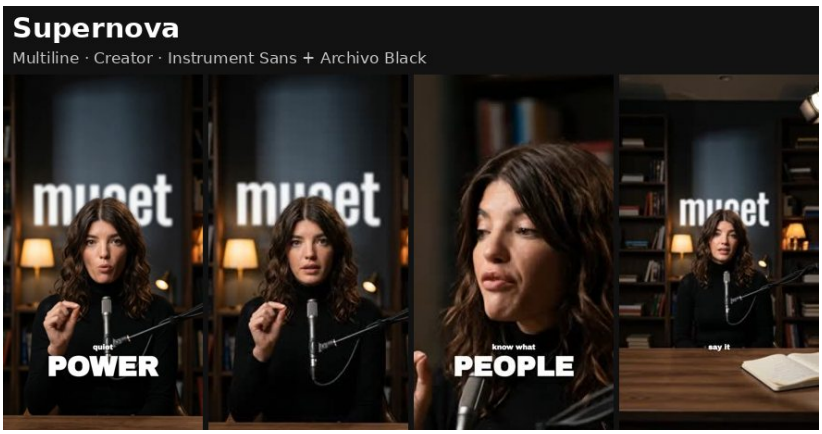

Fonts: Just Me Again Down Here + BBH Bartle
Colours: #FFFFFF #FFC200
Words on screen: Up to 2
As you speak: The spoken word flips to the highlight colour
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

Moonbeam

A glowing hero spans two of three fixed caption lanes.

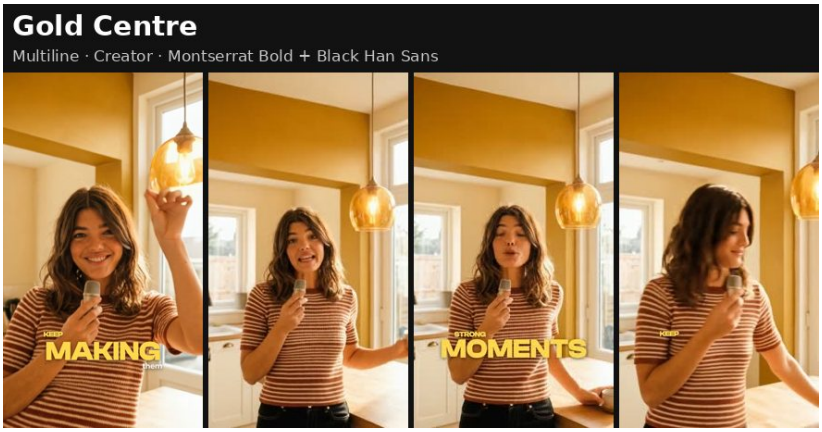

Fonts: Inter Bold + Archivo Black
Colours: #67E8F9
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

Supernova

Small white context with one oversized editorial hit.

Fonts: Instrument Sans + Archivo Black
Colours: #FFFFFF
Words on screen: Up to 6
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

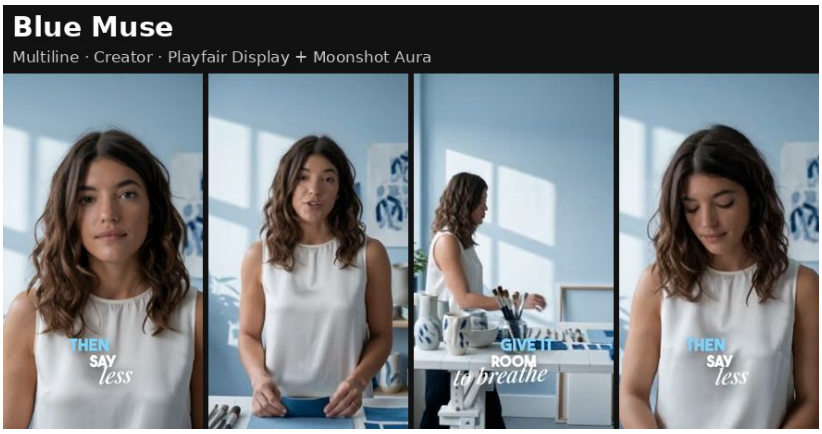

Gold Centre

Compact context with a hard gold all-caps centre word.

Fonts: Montserrat Bold + Black Han Sans
Colours: #FFD84D
Words on screen: Up to 6
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

Use: Use Gold Centre when the middle of a sentence matters most. Compact context lines frame one hard gold all-caps word in Black Han Sans, with up to six words per group, so explainers, opinions and quotes stay efficient while the takeaway word stands out without heavy motion.
Skip: Skip it if the clip has no single takeaway word; the centre treatment needs a clear hero to work.

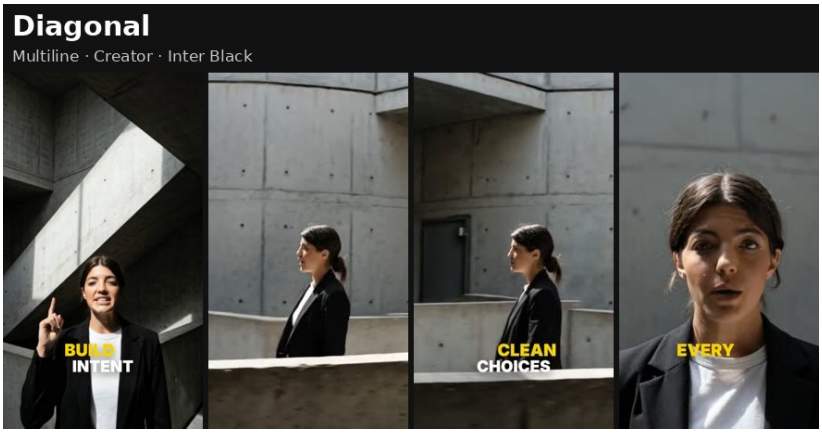

Blue Muse

Playfair italic, compact support type, and one ice-blue uppercase key.

Fonts: Playfair Display + Moonshot Aura
Colours: #FFFFFF #7FD3FF
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

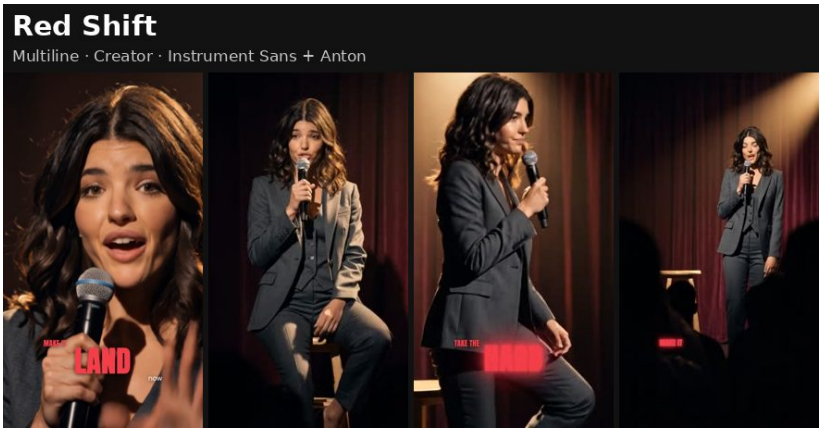

Use: Use Blue Muse when a line should land like a quote. Playfair italic, compact support type and one ice-blue uppercase key word stack into a three-line lockup, which suits opinions, hooks and slower statements in lifestyle, coaching and personal-brand content.
Skip: Skip it for rapid-fire speech or long sentences. Multiline lockups need short phrases, and a crowded frame leaves them no room.

Diagonal

Inter Black roles in a diagonal white-and-yellow editorial lockup.

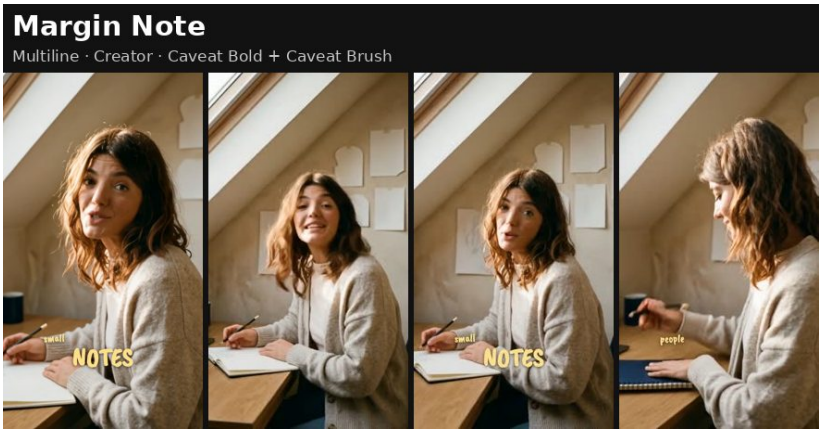

Fonts: Inter Black
Colours: #FFFFFF #F5D300
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

Red Shift

A tall red hero sits between two restrained white rows.

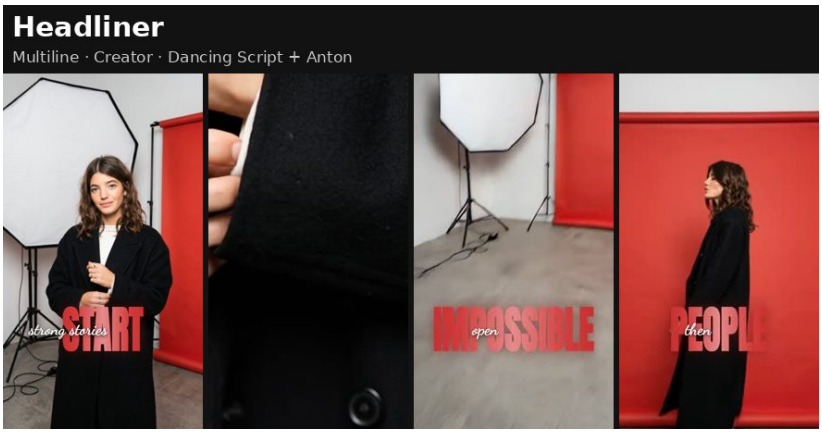

Fonts: Instrument Sans + Anton
Colours: #F43F4A
Words on screen: Up to 6
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

Margin Note

Loose handwritten rows with one warm marker-like word.

Fonts: Caveat Bold + Caveat Brush
Colours: #F8EDE2 #FFE08A
Words on screen: Up to 6
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

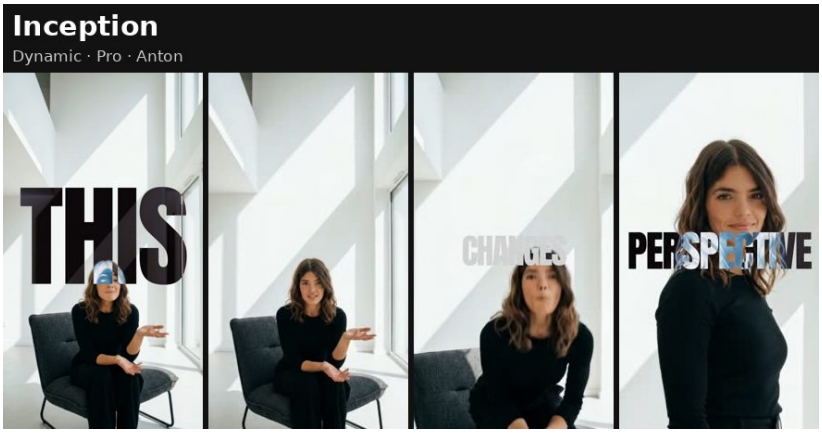

Headliner

Red condensed type against luminous white script.

Fonts: Dancing Script + Anton
Colours: #FFFFFF #D53E3E
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

5. Catalog — Dynamic (6)

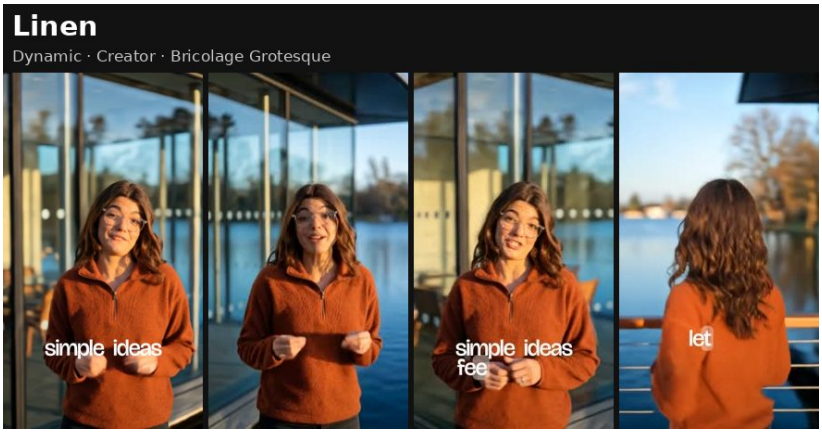

Inception

Impact words invert the footage and fill the frame.

Fonts: Anton
Colours: #D2D2D2 #FFFFFF
Words on screen: Up to 1
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Pro

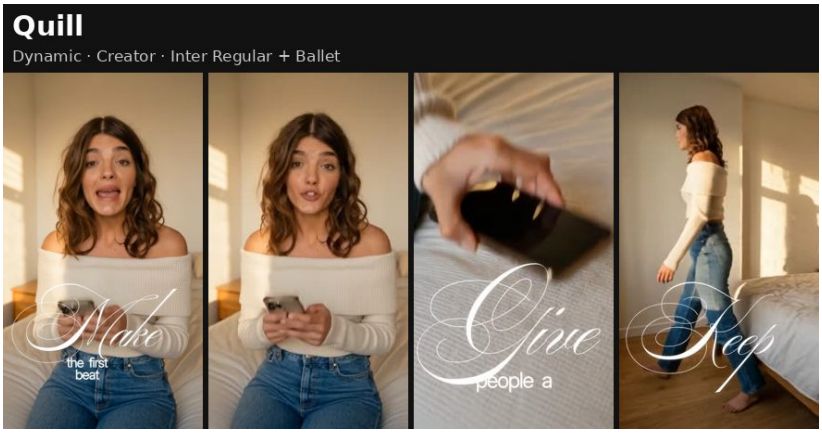

Use: Use Inception when a few words should land like punches. Impact words in Anton fill the frame one at a time and invert the footage behind them, which makes hooks, reveals and countdown beats feel physical in high-energy edits, motivation and reaction clips.
Skip: Skip it for calm teaching or long explanations. A full-frame word at a time tires the eye when every sentence gets it.

Linen

Letters type on behind a translucent cursor.

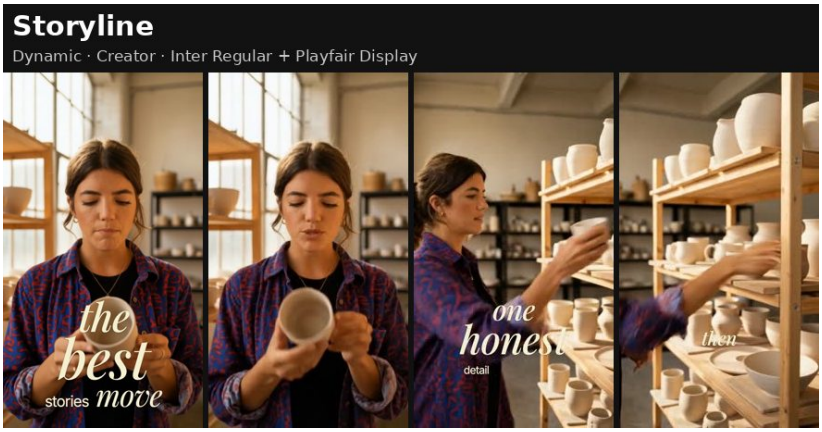

Fonts: Bricolage Grotesque
Colours: #FFFFFF
Words on screen: Up to 5
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

Quill

A script opener flickers over typed supporting words.

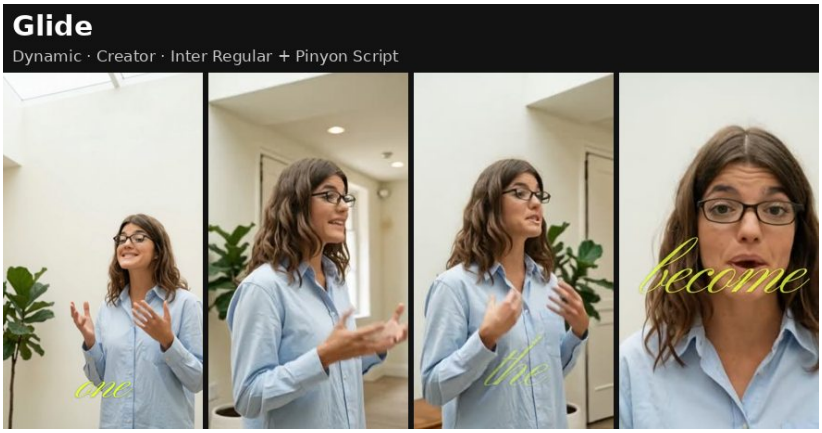

Fonts: Inter Regular + Ballet
Colours: #FFFFFF
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

Storyline

Serif key words slide between clean story beats.

Fonts: Inter Regular + Playfair Display
Colours: #F5F0D0
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

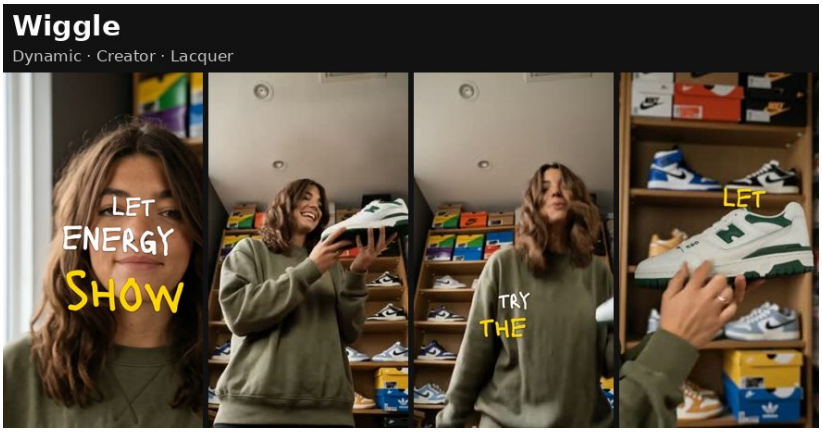

Glide

A bright script word glides through quiet context.

Fonts: Inter Regular + Pinyon Script
Colours: #FFFFFF #DFFF35
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

Use: Use Glide for understated, elegant clips: quiet Inter Regular context with one bright Pinyon Script word gliding through. It suits beauty, fashion, travel and reflective voiceovers where the caption should accent the footage rather than cover it.
Skip: Skip it for mute-first viewing or fast speech. Thin context type and a script hero are harder to read at speed, and very bright footage can swallow the lighter words.

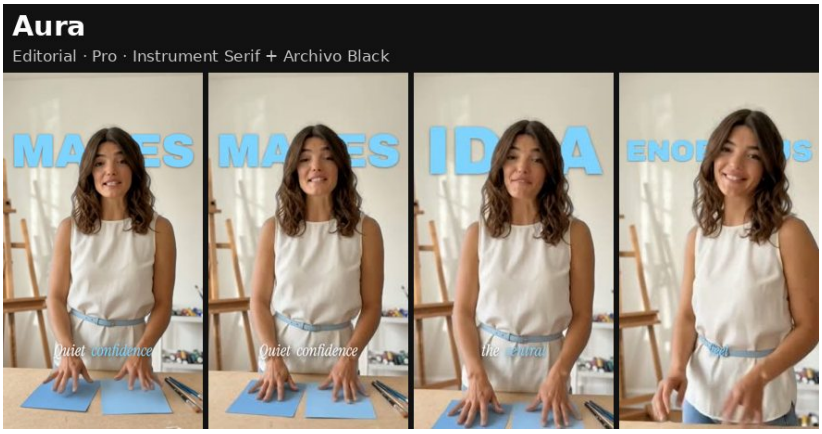

Wiggle

Hand-painted words trace an organic eight-step path.

Fonts: Lacquer
Colours: #FFFFFF #FFD700
Words on screen: Up to 3
As you speak: The spoken word flips to the highlight colour
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

Use: Use Wiggle when the clip should feel hand-made. Words in Lacquer, a hand-painted face, trace an organic path and flip to the highlight colour as you speak. It suits art, crafts, food, kids' learning and casual vlogs where polish would feel cold.
Skip: Skip it for corporate or serious topics, and for long sentences; a hand-painted face is slower to read in bulk.

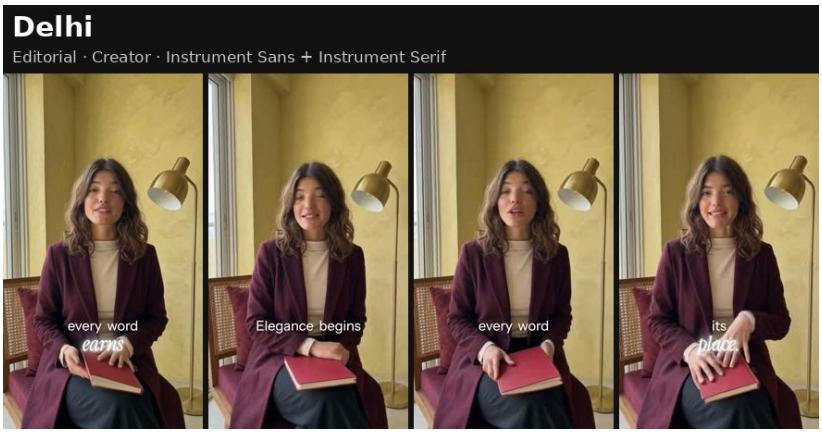

5. Catalog — Editorial (7)

Aura

Serif-italic aside over a huge ice-blue word behind you.

Fonts: Instrument Serif + Archivo Black
Colours: #FFFFFF #7FD3FF
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

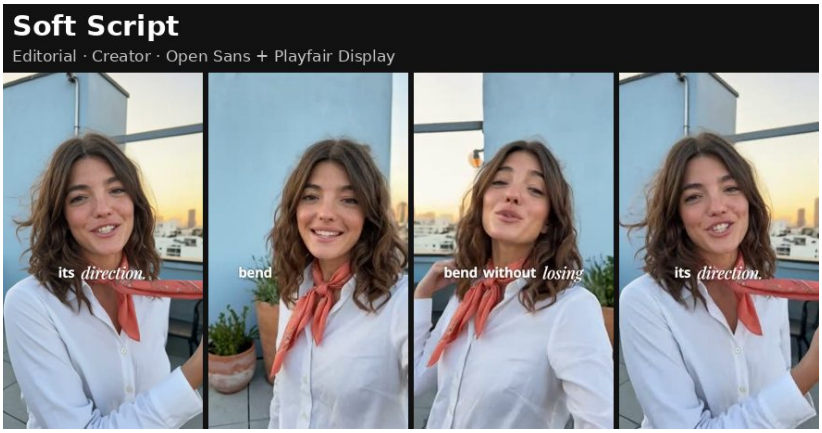

Delhi

Clean sans, then the key word in glowing serif italic.

Fonts: Instrument Sans + Instrument Serif
Colours: #FFFFFF
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

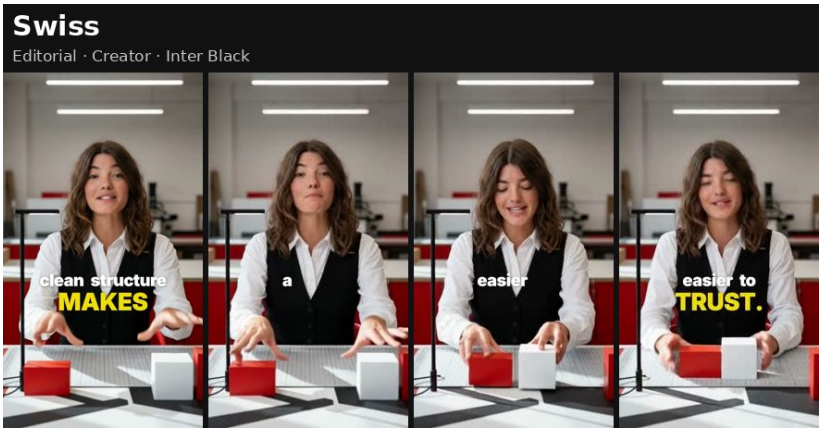

Use: Use Delhi for refined, editorial clips: clean Instrument Sans for the sentence, then the key word in a glowing Instrument Serif italic. It suits design, writing, product thinking and calm explainers where the emphasis should feel considered rather than loud.
Skip: Skip it for high-energy or mute-first content. The italic serif emphasis is subtle by design, so it rewards viewers who are already listening.

Soft Script

Bold white sans with key words in Playfair italic.

Fonts: Open Sans + Playfair Display
Colours: #FFFFFF
Words on screen: Up to 5
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

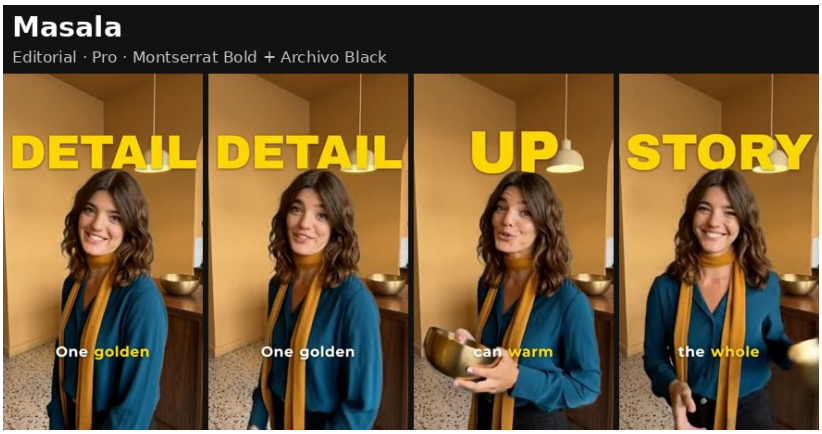

Swiss

White lowercase over hard yellow caps. Pure grid.

Fonts: Inter Black
Colours: #FFFFFF #F5D300
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

Use: Use Swiss when clarity beats flair: tutorials, product walkthroughs, finance and education. White lowercase sits over hard yellow caps in Inter Black on a strict grid, so viewers read the argument rather than watch the animation. It is a dependable default for creators posting several clips a week.
Skip: Skip it if the clip needs a signature look. Swiss is deliberately neutral, and white text over bright, busy footage needs a darker frame.

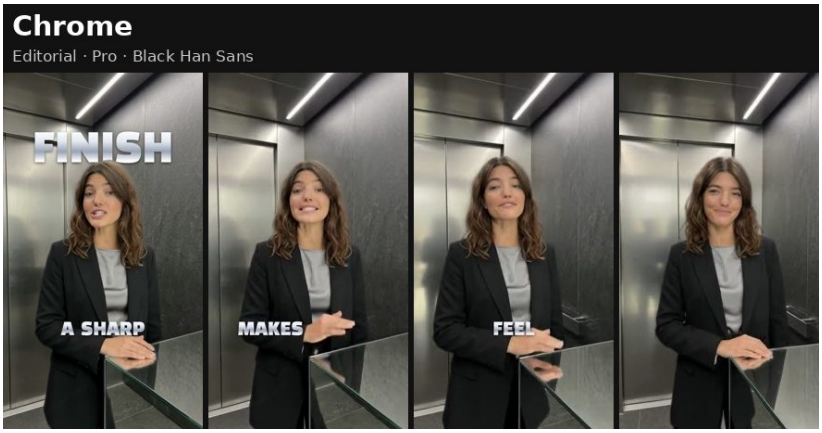

Masala

A whisper of context, then one huge gold word behind you.

Fonts: Montserrat Bold + Archivo Black
Colours: #FFFFFF #FFD700
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no ·
Plan: Pro

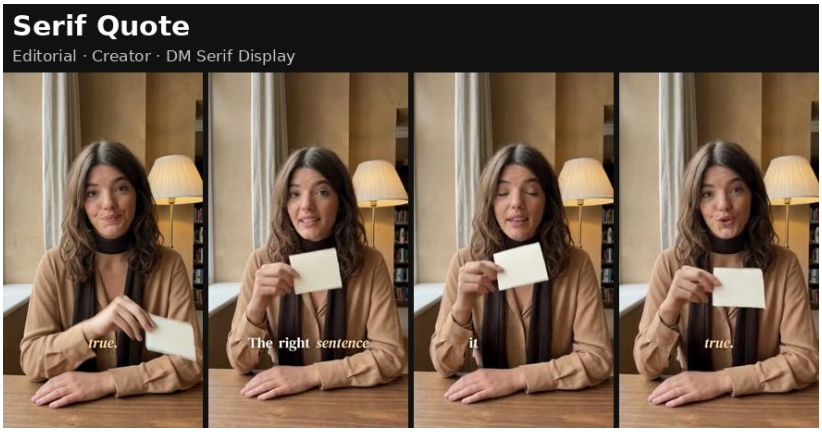

Use: Use Masala for a dramatic reveal: a whisper of context in Montserrat Bold, then one huge gold word in Archivo Black behind you. It suits food, travel, product reveals and storytelling clips where a single word should feel like the headline.
Skip: Skip it if many words in the clip matter equally, and on gold or yellow backgrounds where the hero blends in.

Chrome

Liquid-metal caps locked behind the speaker.

Fonts: Black Han Sans
Colours: #FFFFFF
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: yes · **AI Edit:** no ·
Plan: Pro

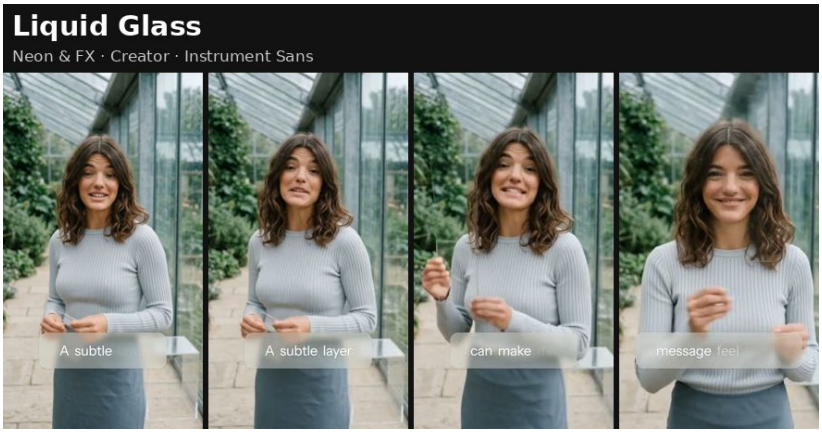

Serif Quote

Editorial serif, sentence case, italic amber emphasis.

Fonts: DM Serif Display
Colours: #FFFFFF #FFD9A8
Words on screen: Up to 5
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

5. Catalog — Neon & FX (1)

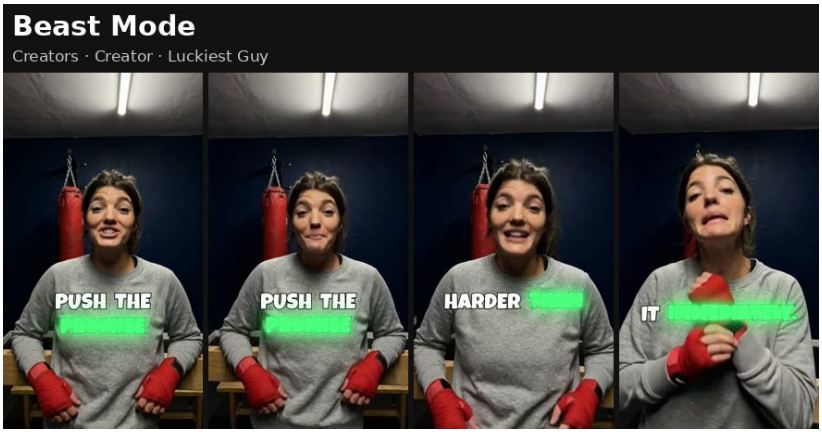

Liquid Glass

A translucent frosted-glass pill with a soft luminous rim.

Fonts: Instrument Sans
Colours: #FFFFFF
Words on screen: Up to 5
As you speak: The spoken word sits in a box
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

5. Catalog — Creators (2)

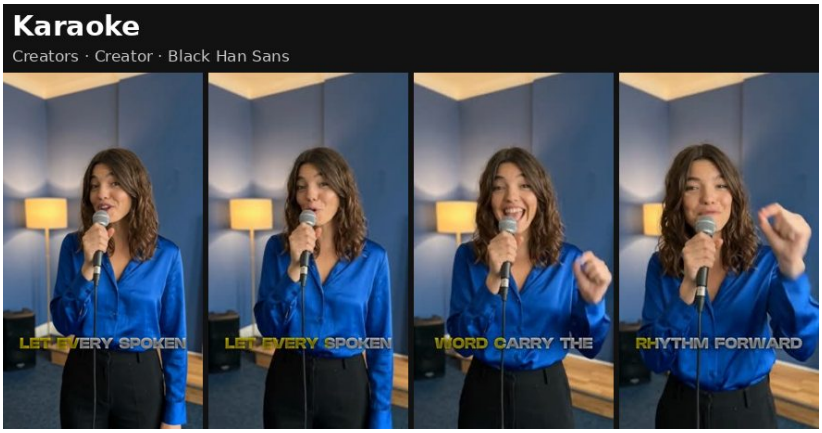

Beast Mode

Comic caps with a fat outline; keywords glow green.

Fonts: Luckiest Guy
Colours: #FFFFFF #3DFF7C
Words on screen: Up to 2
As you speak: Words glow like neon
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

Use: Use Beast Mode for high-energy delivery: comic caps in Luckiest Guy with a fat outline, two words at a time, and keywords that glow green. It suits fitness, gaming, challenges and hype content where the caption should feel as loud as the voice.
Skip: Skip it for calm, thoughtful or professional topics, where comic caps undercut a serious message, and for long sentences that need more than two words on screen.

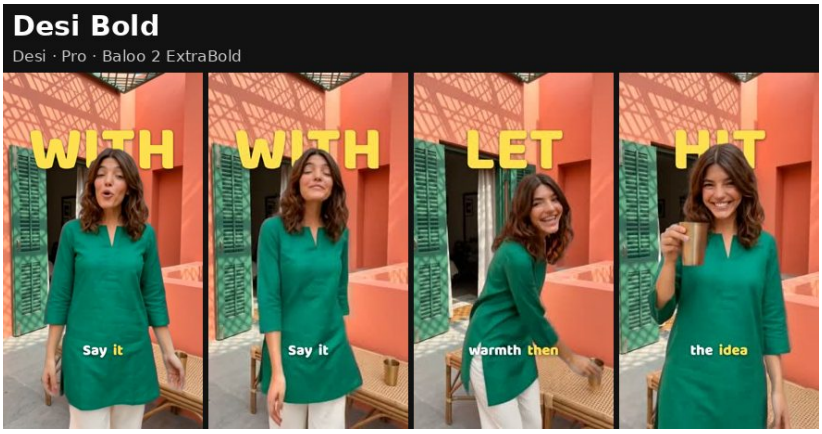

Karaoke

The colour wipes across each word as it's said.

Fonts: Black Han Sans
Colours: #FFFFFF #FFE500
Words on screen: Up to 4
As you speak: The highlight colour wipes across each word as it is spoken
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

Use: Use Karaoke when viewers should follow every word. The highlight colour wipes across each word as it is spoken, in heavy Black Han Sans caps. It is the sing-along caption that works for podcasts, interviews, music commentary and fast talkers watched on mute.
Skip: Skip it if you want a quieter, editorial look. Constant colour motion pulls the eye on every single word.

5. Catalog — Desi (2)

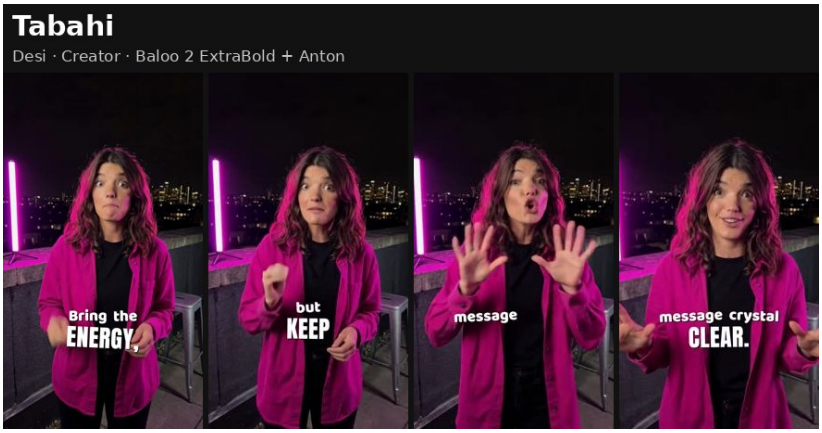

Desi Bold

Hindi and roman in one face; hero word behind you.

Fonts: Baloo 2 ExtraBold
Colours: #FFFFFF #FFE14F
Words on screen: Up to 4
As you speak: The spoken word flips to the highlight colour
Behind speaker: yes · **AI Edit:** no · **Plan:** Pro

Use: Use Desi Bold for Hindi and Hinglish clips. Hindi and Roman text share one face, Baloo 2 ExtraBold, so a mixed sentence looks consistent, and the hero word locks behind you. It suits Indian creators in education, finance, comedy and commentary who switch scripts mid-sentence.
Skip: Skip it for English-only clips that want a lighter editorial feel, and when the frame lacks a clear silhouette for the behind effect.

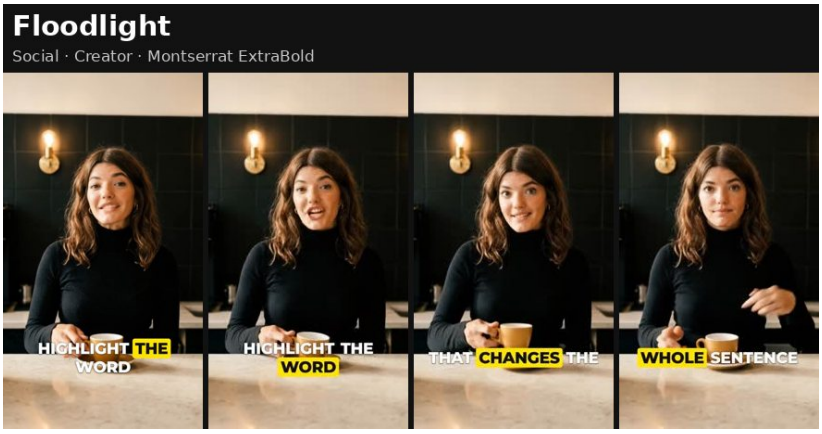

Tabahi

Full hype: comic caps over a rounded Hinglish line.

Fonts: Baloo 2 ExtraBold + Anton
Colours: #FFFFFF
Words on screen: Up to 4
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

Use: Use Tabahi when a Hinglish clip should feel like full hype: comic Anton caps land over a rounded Baloo 2 line that carries Roman and Devanagari text alike. It suits Indian entertainment, reactions, sports, gaming and launch videos where energy matters more than restraint.
Skip: Skip it for calm, informational content, where the hype styling fights a measured tone, and for long sentences that need quieter type.

5. Catalog — Social (2)

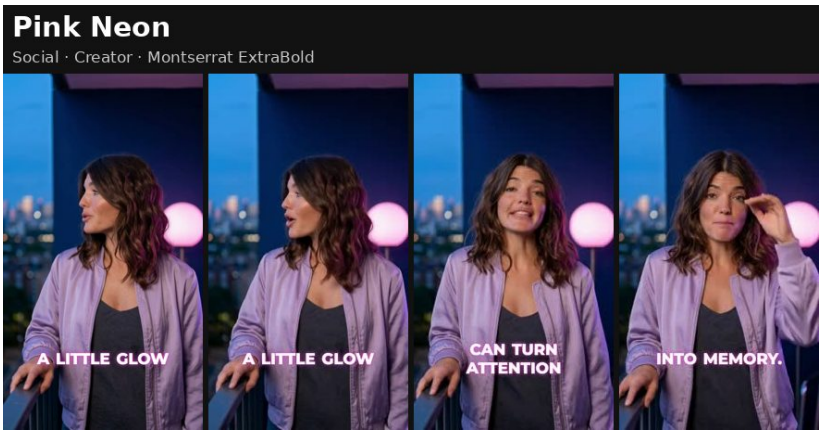

Floodlight

Yellow box, black ink on the key word.

Fonts: Montserrat ExtraBold
Colours: #FFFFFF #FFE500
Words on screen: Up to 3
As you speak: A colour block sits behind the spoken word
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

Use: Use Floodlight for maximum legibility. Black ink in a yellow box marks the key word, in Montserrat ExtraBold, three words at a time. It reads instantly on any background, which makes it a strong default for tips, news, reactions and clips watched on mute.
Skip: Skip it if the look must feel premium or quiet. The yellow box is loud by design and familiar from many feeds.

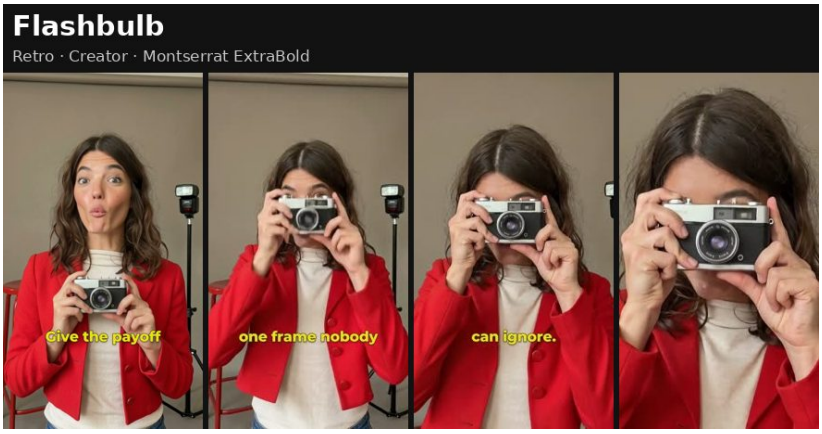

Pink Neon

White caps with a pink neon glow.

Fonts: Montserrat ExtraBold
Colours: #FFFFFF
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no · **Plan:** Creator

Use: Use Pink Neon for evening, lifestyle and beauty clips where a soft glow adds mood without slowing reading. White Montserrat ExtraBold caps carry a pink neon halo, three words at a time, which suits quick tips, recommendations and casual talking heads.
Skip: Skip it on very bright footage, where the glow loses contrast, and on serious topics where neon reads as off-tone.

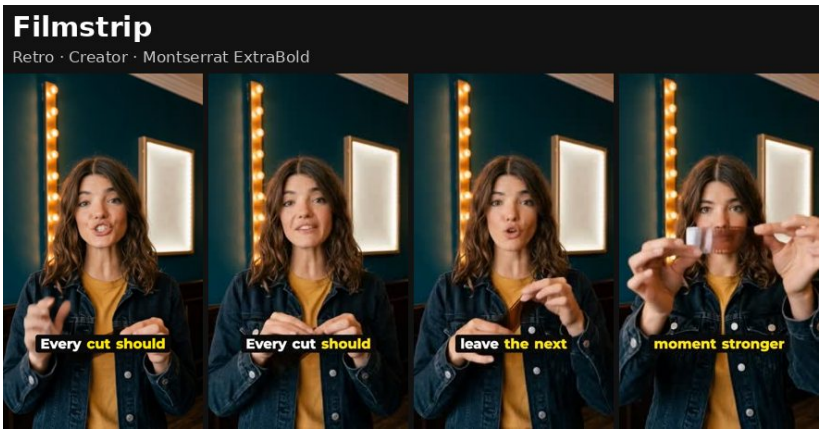

5. Catalog — Retro (4)

Flashbulb

Bold yellow with a black outline.

Fonts: Montserrat ExtraBold
Colours: #FFE500
Words on screen: Up to 3
As you speak: Static emphasis
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

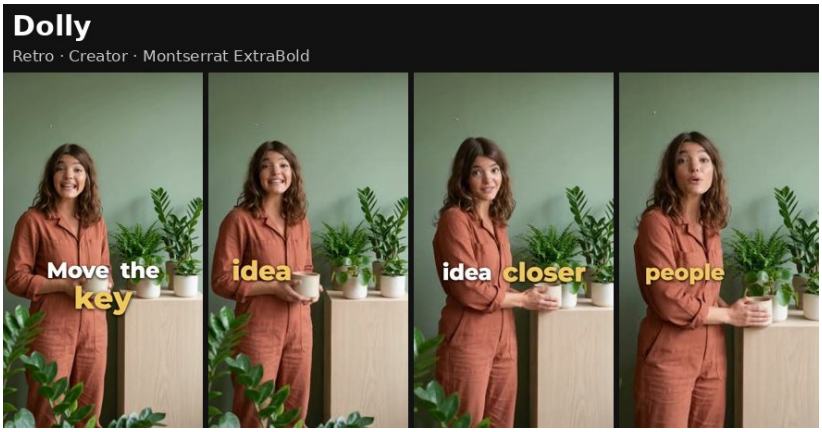

Filmstrip

Black box, yellow active word.

Fonts: Montserrat ExtraBold
Colours: #FFFFFF #FFE500
Words on screen: Up to 5
As you speak: The spoken word sits in a box
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

Use: Use Filmstrip for a classic, readable subtitle bar. Words sit on a black box and the active word turns yellow, up to five at a time. It suits interviews, podcasts, documentary-style clips and longer explanations where viewers need whole phrases on screen.
Skip: Skip it when you want the caption to be part of the art; the black bar is functional rather than decorative.

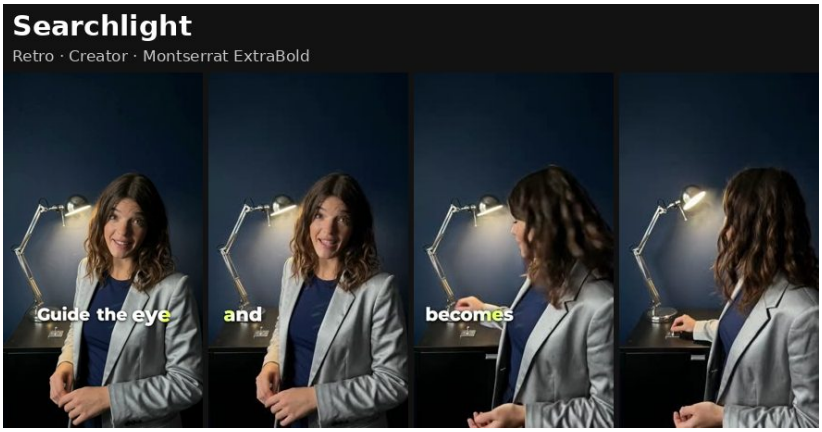

Dolly

Small setup, big keyword slides forward.

Fonts: Montserrat ExtraBold
Colours: #FFFFFF #F6C65B
Words on screen: Up to 2
As you speak: Words spring in as they are spoken
Behind speaker: no · **AI Edit:** no ·
Plan: Creator

Use: Use Dolly for tips and listicles where each line has one keyword: a small setup phrase, then the big keyword slides forward as you say it. Two words per group in Montserrat ExtraBold keep the pace brisk, which suits educators, coaches and how-to clips.
Skip: Skip it when sentences have no clear keyword. The slide-forward move loses its meaning when every word gets it.

Searchlight

A light band scans across the words.

Fonts: Montserrat ExtraBold
Colours: #FFFFFF #D9FF2F
Words on screen: Up to 4
As you speak: A light sweep follows the voice
Behind speaker: no · **AI Edit:** no · **Plan:** Creator
